SSPL UNIT - III

STATE OF THE ART FINISHED FORMULATION FACILITY

Located in Vapi, Gujarat, this state of the art Greenfield facility designed to manufacture multiple dosage forms from a single integrated block. It features automation & 21 CFR part 11-compliant systems ensuring paperless operations, robust data integrity and strict regulatory adherence. The facility produces Tablets, Capsules, Oral Liquids, Ointments & Lotions (with Planned

Injectables). Built to meet global regulatory standards including US FDA, EMA, MHRA, WHO-GMP, and Revised Schedule M, it is positioned as a globally compliant, technologically advanced pharmaceutical hub

TABLET SECTION

Equipped with ACG HSM 300/FBE 250 for efficient wet granulation and drying, ACG LEGACY 6100 rotary tablet press for flexible compression with easy cleaning and automation, ACG SC 250 high performance pan coater for precise, dust-free coating operations.

CAPSULE SECTION

Equipped with ACG AF 90T for high-speed, 21 CFR-compliant capsule filling with quick changeover; Proditech VISITAB 3-MH for automated 360° defect detection under GMP norms; and Anchormark 12 Track / ACG BQS / HiCart Plus systems for precise counting, blistering, and versatile cartoning with serialization-ready controls.

Patent Non-Infringement is the responsibility of buyers & the products are not offered in the countries where valid patents exist

ORALLIQUID SECTION

Equipped with Precikot 6KL integrated line for syrup preparation using ASME BPE vessels with automated CIP; Anchormark Rotary Monoblock for high-speed bottle filling, washing, piston dosing, capping, and inline labelling, and provision for future integration with cartoners enabling serialized packaging.

OINTMENT SECTION

Equipped with Propack 600 KGS automated system for precise ointment/cream preparation with 21 CFR compliance and batch consistency; Pacmac MAC 100 servo-driven tube filler for multiple tube types with high PLC-based accuracy and low maintenance; and Pacmac PAC 100 cartoner with leaflet integration, OCR/barcode verification, & full pharma compliance.

Patent Non-Infringement is the responsibility of buyers & the products are not offered in the countries where valid patents exist

PHASE 2: INJECTABLE (FUTURE)

Injectable (Future): Planned installation of Kairish Innotech COMBI Line for robotic vial, PFS, and cartridge filling with integrated washing, depyrogenation, filling, and sealing; 100% IPC with check weighers for precise dosing and regulatory compliance; and flexible format capability to handle bulk vials, nested syringes, and pre-crimped cartridges with minimal human intervention.

**GLOBAL INTERSTITIAL CYSTITIS,
BLADDER PAIN SOCIETY**

GIBS is India's pioneering initiative for IC/BPS, uniting top urologists, gynaecologists, and SWATI as Founder Patron.

This collaborative effort exclusively addresses interstitial cystitis and bladder pain syndrome, filling a critical gap in specialized care and research for these conditions worldwide.

**In its 8-year journey, GIBS has its presence in 65
Countries**
