OUR TECHNOLOGY & PRODUCTION CAPACITY

Shiv HEALTHCARE is engaged into the production of Small Volume Parenteral (SVP) & Large Volume Parenteral using the latest AFFS (Aseptic Form-Fill-Seal) Technology, the technology is world renowned and widely acknowledged / accepted. Machines are bought from the best of the global leaders. The bottles are blown and filled with the Water for Injection and sealed in closed circuit in most aseptic condition, which is a totally automated process & devoid of any human touch / intervention. The aseptically sealed bottles are further sterilised in Sophisticated Superheated Sterilizer @ 110 degree centigrade.

We are Capable of manufacturing 292 million Sterile Water for Injections ampoules Per Anum (Sterile Water for Injections, Sterile Purified Water for Injections, sodium Chloride Injections and other products). The Production Capacity will be 36.5 million bottles per anum for Large Volume Parenteral.
