

PRODUCT PORTFOLIO

The actives behind *better* formulations.

*A niche nutraceutical house, built
around quality rather than volume.*

Aurora Farmabio develops and supplies a focused portfolio of premium branded actives to formulators in India and export markets. We take on molecules where sourcing, characterisation and documentation genuinely decide the quality of the finished product — and we stand behind each one.

Actives for bone health, women's health, pain, beauty-from-within, energy and sleep — vegetarian by source, characterised batch by batch, and available as ingredients or as finished formulations.

High-quality ingredients for your *high-quality* products.

Launch the product, *not the raw material.*

For customers who would rather enter the market than develop for it. Selected products are offered as finished formulations with the development work completed and the applicable approvals in place for the intended market — confirmed case by case before supply.

*One partner from active to
finished pack.*

Formulation settled

Composition, overages and label claims already worked out, so no development cycle at your end.

Stability established

Stability studies are conducted on the finished pack and shelf life assigned on that basis.

Regulatory status

Approvals and source declarations applicable to the product and market, confirmed before supply.

DOSAGE FORMS

Tablets

Capsules

Softgels

Sachets & powders

Oral liquids

Effervescent
