## Composition

Arjun Chhal 150 mg, Sarapgandha 150 mg, Gaduchi 70 mg, Trifala 50 mg, Sonakal 50 mg, Brahmi 30 mg

- Managing blood pressure was never so easy and safe

## Beneficial In

- Controls blood pressure throughout the day by safe & natural way.
- Provides cardiovascular benefits with Arjun, Guduchi, Trifla & Sonakal
  - Arjun: Helps in Cholesterol maintenance
  - Guduchi: Cardio-tonic and hematopoietic activity and is effective in cardiac debility.
  - Trifla: Cardio-cerebro vascular diseases
  - Sonakal: Produces thrombolytic effect
- Helps keeping lipid profile normal with Arjun, Trifala, Sarpagandha
  - Sarpagandha: Reduces anxiety and allows good quality of sleep
  - Brahmi: Reduces anxiety and tension

## Indication (Useful In)

- Blood pressure fluctuation
- Hypertension
- Hypertension with abnormal lipid profile
- Hypertension with anxiety, tension & insomnia

## Presentation

1x50 Capsules

Effective blood circulator

## Composition

Gudmar buti 25 mg, Mamejawa 25 mg, Galo 25 mg, Nagarmoth 25 mg, Kesuda 25 mg, Vavding 25 mg, Karela 35 mg, Jambu Seeds 35 mg, Trifla Ghan satva 45 mg, Shudh Shilajit 10 mg, Chirata 25 mg

## Beneficial In

- Prevents high blood sugar levels with Gudmar, Mamejawa, Karela, Jambu seeds, Kesuda & Shilajit
- Improves metabolic process in the liver, digestion & absorption with Chirata & Trifla
- Improves immunity & prevents autoimmune reaction with Galo
- Produces rejuvenative effect on pancreas & other body organs with Rasayan effect of Galo, Shilajit & Trifla
- Produces antimicrobial & hypolipidemic effect with multiple ingredients
- Better than allopathic antidiabetic drugs
  - No side effects on the kidney or the liver
  - No drastic changes in sugar levels leading to fainting

## Indications (Useful In)

- Both type I & type II diabetes
- Hyperlipidemia associated with diabetes
- High Blood pressure associated with diabetes
- Metabolism related disorders occurring in diabetes
- Irregular Urine sugar level in diabetes
- Irregular Blood sugar level in diabetes
- Cardiac diseases associated with diabetes
- Type II diabetes mellitus (Both high fasting & high PPBS)
- Diabetes with hypercholesterolaemia, besity or constipation
