

Product Catalogue

HAEMODIALYSIS CATHETER KIT

Features:

- ❖ Available in Single, Double or Triple Lumen Catheter.
- ❖ Multiple sizes for various patient needs.
- ❖ Made using biocompatible material.
- ❖ Can be customized as per client requirement.

BLOOD TUBING SET

Features:

- ❖ Blood tubing set has been specially designed for the patient to connect external system which extracts patient's blood to the dialyzer and then returns patient's blood from the dialyzer.
- ❖ Consists of two parts - arterial and venous - used during dialysis and attached with fistula and dialyzer.
- ❖ Unique chambers reduce foaming, increase air removal and do not trap epo compliant material of transducer protectors. This helps in ensuring secure machine fit and less incidence of wet out.
- ❖ Color coded ergonomic clamps and dialyzer connectors with tethered caps that seal tightly for disposal.
- ❖ Kink resistant blood tubing handles easily and ensures fast priming
