About:

Suncare Formulations Pvt Ltd is a pharmaceutical manufacturing and marketing company that operates out of State of the Art twin plants in Dehradun, and a head office in Delhi. We started as a small organisation in Raxaul back in 1990, and have grown to a company that boasts a portfolio of over 100 products and manufactures for some of the biggest names in the industry today.

Both of our manufacturing facilities meet the WHO-GMP norms as per schedule 'M' of the Indian Drug Act, and conform to the highest international standards. Over the years we have successfully managed to exceed the expectations of all the regulatory authorities who have recognized and certified us, like, the World Health Organization (WHO), the Food Safety and Standards Authority of India (FSSAI), the Central Drugs Standard Control Organization (CDSO), the Defence Research and Development Organization (DRDO) and the Bureau of Pharma Public Sector Undertakings of India (BPPI).

We envision being a leading pharmaceutical company in India and to become a global player by providing high-quality, affordable and innovative medicines. Our mission is to fill the unmet gaps in healthcare and deliver total customer satisfaction.

Key Features:

Production Capabilities:

Suncare's reputation rests on the quality of its products and is the mainstay of our work. Right from our inception, quality has been our top priority. We have instilled a culture of maintaining high standards of compliance and quality at every level within the organization.

Our top focus over the years has been to enhance our quality standards and systems. All the equipment installed and procedures established make sure that the environment within the premises meets the highest possible standards. Stringent process control and layouts have been laid down keeping in mind the importance of hygiene, product safety and efficacy and ensuring compliance to the highest international and domestic standards possible. The facilities have a combined output of over 60 million tablets and 4 million bottles of liquid orals per year.
