About Us

At Stellar Formulations, we take pride in our steadfast dedication to excellence in Pharmaceutical and Nutraceutical manufacturing.

We focus on patient convenience and drug efficacy, leveraging our core strengths to deliver high-quality, cost-effective and innovative products.

What do we do?

Our **WHO-GMP** approved manufacturing facilities are located in Vadodara & Silvassa with an on premise fully efficient lab.

End-to-End Solutions: We offer a comprehensive range of services, from early-stage development to commercial-scale production; making us a trusted partner for contract manufacturing in India.

Expertise Across Therapeutics: Specializing in a wide range of therapeutic areas to meet diverse client needs. We specialize in novel drug delivery systems (NDDS) such as **sustained release, delayed release, dual peak and enteric-coated** formulations.

All our products are tested in-House with **compendial methods** with the use of high-end analytical equipment from brands such as Shimadzu, Electrolab etc.

Trust us to transform your **innovative ideas** into successful, customized, market-ready products with precision, efficiency and the highest quality standards.

Our innovative products...

Pancreatin EC Pellets formulated with a **gastro-resistant approach**, designed to rapidly disintegrate in the small intestine (at pH > 5.5) to release enzyme activity.

- Should be taken with food
- Products are tested as per compendial methods
- Stability data available

Pellets are ready to be filled in capsules, sachets and other dosing devices

Asia-Pacific is the largest consumption place for Pancreatin, with a consumption market share nearly 33%, making this a huge market opportunity.

Same pellets can be used for any strengths of Pancreatin capsules i.e. (10000, 25000, 40000 Ph.Eur/USP)

Dissolves within 30-60 minutes in the intestine at optimum pH

Product comparable to the innovator

Nanosol Technology

Microgranules with an ability to spontaneously form micellized polymeric nanoparticles on dissolution in water.

- Improved therapeutic efficacy
- Product is tested as per compendial methods
- Stability data available

More than 60% people are estimated to be deficient in Vitamin D3 globally making this a very big market opportunity.

Can be used in any delivery format like **sachets, capsules, chewable tablets, orally disintegrating tablets & liquids** with customized flavor profile for desired target demographic.

Bio-Availability

Faster absorption and improved bioavailability compared to poorly absorbed oil soluble formulation

Water Soluble

Completely dissolves in less than 30 seconds to form a clear solution

Improved Stability

Highly stable compared to oil-based and liquid formulations

With or without food

Food intake does not affect oral absorption

Also available in **Veg Origin**

Email us at : bd@stellarformulations.in

Or call us on +91 899 971 1797

Our Vitamin D3 granules are completely water-soluble suitable for vegetarians and are extracted from Plant Source

Nanosol Technology

Made with an ability to spontaneously form micellized polymeric nanoparticles on dissolution in water.

Product is suitable for Nutraceutical segment

Bio-Availability

Faster absorption and improved bioavailability compared to poorly absorbed oil soluble formulation

Water Soluble

Completely dissolves in less than 1 min

Improved Stability

Highly stable compared to oil-based and liquid formulations

With or without food

Food intake does not affect oral absorption

Can be used in any delivery format like sachets, capsules, chewable tablets, orally disintegrating tablets & liquids, with customized flavor profile for desired target demography.

Microgranules can also be used for food fortification.

Vitamin D3 + K2 (M7)

Microgranules

Stabilized water soluble
microgranules

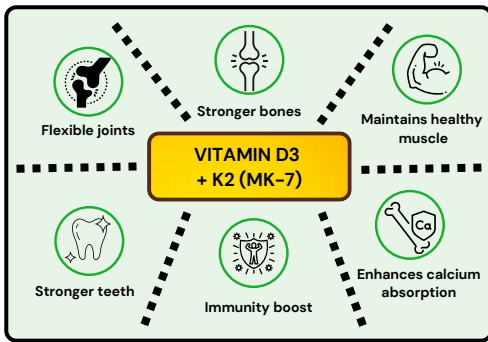

Nanosol Technology

Formulated to offer better absorption and improved bioavailability

Double Encapsulated

Vitamin K2 MK-7 is resistant to harsh environment

Highly stable and water soluble microgranules

Dissolves in less than 45 seconds in water

Can be taken with or without food

- Ideal for pairing with other minerals like calcium for maximum absorption
- Product is tested as per compendial methods
- Stability data available

Vitamin D3 and Vitamin K2 ensures easy absorption of calcium and ensures it reaches the bone mass, while preventing arterial calcification. Helps to keep your heart and bones healthy.

Can be used in any delivery format like sachets, capsules, chewable tablets, orally disintegrating tablets, with customized flavor profile for desired target demography.

Our ultra-compact 6mm Any-prazole tablet delivers the same efficacy with enhanced patient compliance.

ADVANTAGES

Enhanced patient compliance

Significant for pediatric/ geriatric populations, & patients with dysphagia. Size of the tablet is small compared to the majority formulations in the market.

Vegetarian-friendly dosage form

Tablet is free from animal-derived ingredients for vegetarians to align with their medication choices

Cost effective

Economical compared to market formulations.

Enhanced Stability

Particularly in humid or moisture-prone environments, tablets ensure consistent drug potency and shelf life over time.

Available with below Prazoles-

- ⊗ Rabeprazole 20 mg EC Tablets
- ⊗ Pantoprazole 20/40 mg EC Tablets
- ⊗ Esomeprazole 40 mg EC Tablets

To know more about the products,

PRAZOLE blocks acid secretion with excellent safety profile
DOMPERIDONE increases GI motility & prevents reflux
COMBINATION for the treatment of GERD, dyspepsia and related disorders

Any Prazole and Domperidone in a **mono layer tablet** form.

Any Prazole enteric coated and Domperidone in sustained release manner.

ADVANTAGES

Enhanced patient compliance

Significant for pediatric/ geriatric populations, & patients with dysphagia. Size of the tablet is small compared to the majority formulations in the market.

Vegetarian-friendly dosage form

Tablet is free from animal-derived ingredients for vegetarians to align with their medication choices

Cost effective

Economical compared to market formulations like mini-tablet in Tablet and bi-layered formulations.

Enhanced Stability

Particularly in humid or moisture-prone environments, tablets ensure consistent drug potency and shelf life over time.

Aspirin High Concentrated Pellets

85% w/w pellets

We have developed high potency Aspirin pellets with improved stability across shelf life.

Aspirin works by reducing prostaglandins, that control the body's inflammatory responses and processes like blood flow and the formation of blood clots.

Reduced levels of free salicylic acid which in turn reduces potential for Aspirin hydrolysis

Improved stability as compared to existing formulations

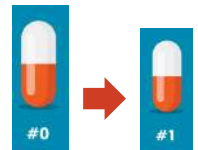

- Highly potent formulation means reduced fill weight per capsule which equates to smaller capsule size.
- Enhanced patient compliance for everyday ingestion.

Leading brands currently in the market come in **Size 0** capsules. Using our high concentration pellets, we are able to reduce the Capsule **Size to 1**.

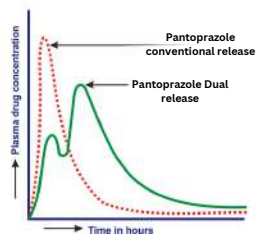

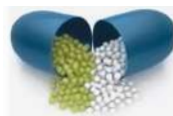

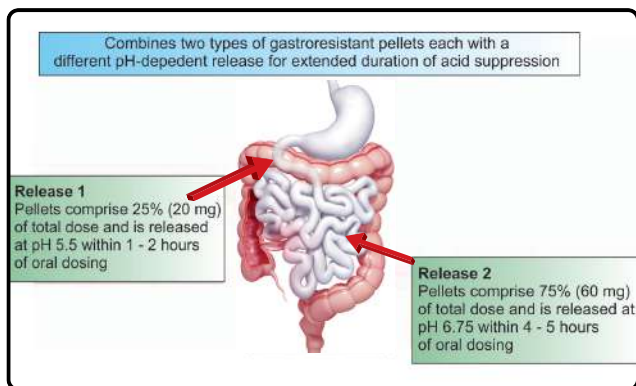

Size reduction in capsule size from Size 0 to Size 1

Aspirin 75mg + Clopidogrel 75mg + Atorvastatin 10mg
Aspirin 75mg + Clopidogrel 75mg + Atorvastatin 20mg
Aspirin 75mg + Clopidogrel 75mg + Rosuvastatin 10mg
Aspirin 75mg + Clopidogrel 75mg + Rosuvastatin 20mg
and any other combination

Dual Delayed Release formulations, a novel approach to overcome the limitations of conventional therapy.

Pantoprazole 80 mg dual peak pellets

- Mean plasma concentration for dual release products shows two consecutive peaks with a **pulsatile release pattern** compared to the conventional delivery system and a longer effective blood plasma concentration.
- Dual release technology is proven to be highly effective to avoid nocturnal acid breakthrough (NAB) which allows patient to take PPIs without complaining of the overnight heartburn.
- We can develop all **Prazoles** using this technology like Dexamprazole, Rabeprazole, Esomeprazole, etc.
- We can successfully target all chronic diseases related with bio-circadian rhythm with the same technology (eg. Cardiac diseases, Rheumatoid Arthritis, epilepsy, peptic ulcer).

To know more about the dual release pellets,

Email us at: bd@stellarformulations.in

Or call us on: +91 8999711797

Lactase **Immediate Release** pellets formulated for quick action.

(3000 - 9000 FCC units)

Can be taken along with food

Helps quickly digest dairy

Benefits people with lactose intolerance / deficiency

Approximately 68% of the world's population has lactose malabsorption making lactase supplements a huge market opportunity.

Can be used in any delivery format like sachets, capsules, mini tabs in capsule, tablets for desired target demography.

Lactase **Sustained Release** pellets formulated for long lasting effect.

(10000- 22000 FCC units)

One dose lasts upto 6 hours

High potency pellets

Extra strength to aid digestion for a longer period

- Product is tested as per compendial methods
- Stability data available

Papain pellets

Contains naturally sourced ingredients

Papain pellets formulated to deliver a **Immediate Release** action in the stomach to aid in digestion.

Our Papain pellets are highly stable and readily available to be filled into capsules.

High potency pellets

An advanced after meal supplement that helps maintain daily digestive health

Can be taken immediately after food and supports healthy nutrient absorption

- Enzymatic support for healthy digestion
- Product is tested as per compendial methods
- Stability data available

Papain is driven by rising health awareness. Market size is estimated to reach \$371.8 million by 2026, growing at a CAGR of 4.9% during the period 2021-2026 making it a huge market opportunity.

We offer Domperidone pH independent SR pellets where Domperidone is designed to dissolve in a sustained manner in the GI tract independent of the pH.

Digestive tract pH and time

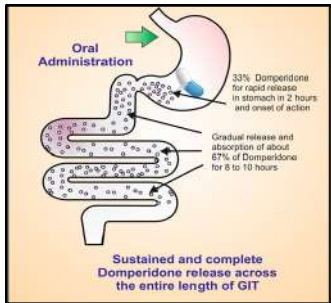

pH: 1.0-2.0
 Time: 1.00-3.00 hr

pH: 4.0-7.0
 Time: 1.00-5.00 hr

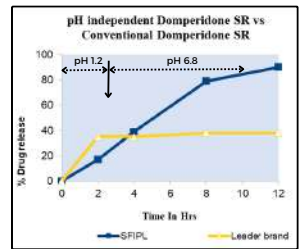

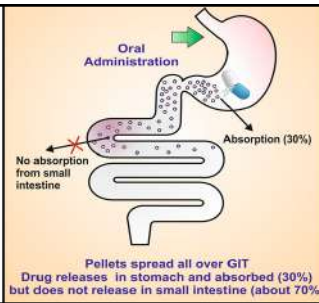

pH: 4.0-7.0
 Time: 10.00 hr several days

- Domperidone SR MOA uses 0.1N HCl for 12hrs (pH 1-3) as dissolution media
- However, pH changes over the digestive tract
- Domperidone SR MOA to mimic condition in Digestive tract should use 0.1N HCl for 0-2hrs and a phosphate buffer of pH 6.8 for 2-12hrs as dissolution media

In vivo behaviour of Domperidone pH-independent pellets dissolution in the stomach

In vivo behaviour of Domperidone pellets having pH-dependent release in the stomach

Our pellets are formulated to be absorbed in the stomach (about 30% in 2hrs) and intestine (gradually over next 8 to 12 hrs)

Initial drug release in stomach provides rapid relief to patient from acid reflux while the gradual release ensures relief from reflux for a prolonged period.

.....
