## CEO MESSAGE

Dear Patrons,

I would like to take this opportunity to thank our outstanding clients and partners for their continuous support in helping to keep Ravian Life Science (RLS) growing.

Since its founding in 2005, RLS has amassed over two decades of experience and the reputation of manufacturing a broad variety of high-quality pharmaceutical formulations for both the domestic and international markets. The company is promoted and led by a group of professionals of varied expertise and experience. Our dedication is in manufacturing superior quality of drugs at a reasonable cost and upholding a punctual delivery schedule.

RLS has a cutting-edge manufacturing facility at SIDCUL Haridwar. The highly skilled workforce at this state-of-the-art manufacturing facility upholds strict safety regulations and quality requirements. Numerous accreditations and certifications, including the WHO-GMP, PPB (Kenya), NDA (Uganda), MoH Cambodia, DPML (Ivory Coast), Guinee GMP, and others, attest to our proficiency in quality control.

RLS's primary business is contract manufacturing; it has the capacity to produce a broad range of pharmaceutical products in liquid and solid dosage forms, as well as external preparations, for both domestic and foreign markets. More than 300 commercial formulations, encompassing the cardiovascular, antibiotic, antidiabetic, anticonvulsant, antidepressant, and antiallergic sectors, have been made by us with experience. We take pride in being the one who sell these products in over 25 countries across the globe, including Latin America, ASEAN, West Africa, and the Gulf Cooperation Council.

Our team of skilled experts work on the creation of novel pharmaceutical products and offers advice on a variety of scientific and legal compliance issues. We are proficient in creating high-quality dossiers that adhere to national regulations as well as CTD and ACTD formats.

With the most up-to-date instrumentation, chemical, and microbiology equipment available, together with a team of knowledgeable staff, RLS has a fully functional in-house testing facility.

With the commitment and help of our capable staff at RLS, we aim to grow the firm by introducing innovative drugs, creating cutting-edge formulations, and expanding our presence in the overseas market.
