Group of Companies

Redefining the Standards in Healthcare

COSMAS

A WHO-GMP Accredited Company

www.cosmas.in

About Us

Cosmas Group of Companies was established in 1994 as a humble drug formulation unit at Ludhiana, the industrial hub of Punjab (India). Today, it has two companies dedicated to providing high quality pharmaceutical products under its hood.

Cosmas is engaged in manufacturing and marketing Pharmaceutical and Health Care Products. It has organized distribution tie-ups with a product range of around 750 products and still growing. Cosmas is known as a quality conscious and conscientious drug manufacturer of India and comes as an ideal partner for Contract Manufacturing of quality products.

The Cosmas Group of Companies has claimed new heights by setting up its ultramodern advanced markets compliant Drug and Pharmaceutical facility that primarily focuses on Oncology and Cephalosporin range of products, both Injectable and Oral solids.

Vision

To make persistent efforts to innovate and offer exceptional, cost-effective pharmaceutical drugs that alleviate human suffering

Mission

To revolutionize the Indian Pharma Industry by providing excellent quality Pharma & Healthcare products and establish a strong foothold in the international market

Primary objectives

- State-of-the-art manufacturing facilities
- Consistency in maintaining high quality drugs
- Constantly expanding product portfolio
- Commitment to delivery schedule

Quality

Cosmas is known for offering best-in-class quality products that exceed customer expectations. Keeping quality as a measuring unit of performance, the entire production process of Cosmas is conceded under rigorous quality measures and observations. It follows operations with preset equivalence of USFDA and UKMHRA Quality Management Standards and is in the process of attaining all these by the end of 2026

Cosmas has developed comprehensive testing facilities for multi-stage inspection of all molecules of manufacturing right from raw material procurement and dispensing analysis to moisture/humidity processes, dryness and packaging parameters. Its Quality Assurance and Quality Control Departments perform stringent quality checks that enable the Group to deliver international quality medicines. The advanced captive sample and tool room facilities of the Group assist in manufacturing products of various sizes and shapes to match customer specifications.

Formulation & Development

The full-fledged Formulation & Development (F&D) Department of Cosmas helps in expanding existing product lines and developing innovative formulations. This Department has been constructed in total compliance with National Health Ministry and has a microbiological and chemical, analytical laboratory and a well-trained staff. The efforts of this Department were recognized with the approval of more than 100 new Cosmas drug molecules from Drug Controller General of India.

The F&D Department is manned by proficient chemists and developers. This Department aims at offering international standard and high value products to customers.

Technical and industrial expertise of Cosmas has enabled it to manufacture best quality finished dosage forms such as Tablets, Capsules, Injections & Dry Syrup. This has enabled Cosmas to successfully offer innovative and affordable life-saving medicines to national and international customers.

Infrastructure

Cosmas has developed a sophisticated manufacturing facility in Ludhiana equipped with ultra modern infrastructure and world-class technology.

Salient features of Cephalosporin Block

- Automatic powder transfer system in OSD in a closed loop
- Injectable lines imported from Macofar (Italy) with RABS technology
- High production capacity
- Plant specially designed at low RH & temperature, most suitable for Clavulanic Acid preparation
- Water system completely fitted with 'Zero Dead Lag Valves' of GEMU (Germany), to avoid microbial growth
- Dehumidification system imported from Munters

Salient features of Oncology Block

- Compatible with OEL level-5
- All the machines have been imported from IMA, Italy
- Facility of lyophilisation with IMA Edwards Lyo
- All the machines are 21-CFR, Part-11 compliant
