Bulk Drugs

➡ Zinc Sulphate Monohydrate - IP/BP/USP/FCC

➡ Zinc Sulphate Heptahydrate - IP/BP/USP/FCC

Advantages of Stabilised/Coated Vitamins

- Available in various bases & concentrations, having different strengths to suit needs of specific customers
- Ensures potency of vitamins till end of shelf life
- Good flow properties and easily mixes with other products
- Easy to handle during production unlike unprocessed vitamins which causes hassles during production
- Reduced overages helps the company save on costs
- Most products are manufactured as per the needs of the customer
- Available in economic pack sizes to suit small and medium companies (1 kg, 5 kgs, 10 kgs, 25 kgs packed in Corrugated Boxes / Fibre Drums / HDPE Drums and Bags)
- Coating process converts hygroscopic material into non - hygroscopic form (Calcium D Pantothenate)
- No processing required at formulators end
- Less rigid storage conditions
- Bio-availability of the Vitamin is not altered by the coating process

Protein Supplements

➡ Sodium Caseinate
