PIONEERS IN LIFE-SAVING DRUGS

SAVING LIVES

WORLDWIDE

At **Vins Bioproducts Ltd**, we lead the way in developing and producing **life-saving drugs**. With unwavering dedication, we make a profound impact on saving lives. Our commitment to excellence and advancing healthcare drives us to **push boundaries, delivering transformative solutions globally**. Together, we bring hope and healing to patients in need.

Forging a Path of Innovation and Excellence Pioneers in Life-Saving Biopharmaceuticals

Since our establishment in 1997, VINS Bioproducts Ltd has been at the forefront of pioneering anti-sera and immunoglobulins that combat snake bites, dog bites, scorpion bites, diphtheria, tetanus, and gas gangrene. Our advanced manufacturing facilities in Hyderabad, coupled with a CPCSEA-regulated 150-acre horse farm housing over 2000 equines, empower us to deliver exceptional products.

With international regulatory approvals, we proudly supply our life-saving solutions to over 100 countries across the globe. Collaborating with esteemed organizations like WHO, UNDP, PAHO, we ensure the widespread distribution of our critical antisera and immunoglobulins. Recognized by the Indian government for our unwavering adherence to global quality standards and regulatory systems, we remain committed to providing innovative and life-saving solutions that impact countless lives worldwide.

Vision & Mission

🎯 To be a global leader in the biopharmaceutical industry with internationally benchmarked quality & regulatory systems.

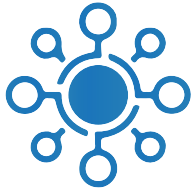

🎯 Making quality an inherent part of everything we deliver, ensuring highest level of product safety and efficacy.

🎯 Forging strong customer relations by delivering outstanding products and services delivering value to patients and stakeholders.

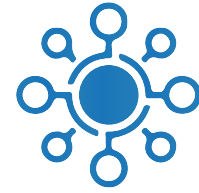

🎯 Driving innovation through strategic research and business partnerships that have the potential to advance the frontiers in healthcare.

🎯 To prioritize human resource development through comprehensive training, monitoring, and leadership empowerment.

Facilities

Manufacturing, Horse Farm & Distribution

Manufacturing

- VINS Bioproducts Ltd operates a state-of-the-art manufacturing unit that adheres to CGMP (current Good Manufacturing Practices) standards. The company's manufacturing facilities include a dedicated plasma block that meets international standards and benchmarks, ensuring the highest quality standards for their products.

Horse Farm

- In addition, VINS Bioproducts Ltd maintains a horse farm that is compliant with CPCSEA (Committee for the Purpose of Control and Supervision of Experiments on Animals) regulations. The farm houses over 2000 horses, which serve as a vital source to produce equine-based biologicals. The company takes great care in ensuring the ethical treatment and welfare of the horses at its farm.

Distribution

- Seamless distribution with a robust and validated cold chain, ensuring end-to-end temperature maintenance, reliable product delivery, and global reach.
