AYUROMA CENTRE

- The Director & Founder of the company Mr. Anurag, a farmer's son, having grown, playing and toiling in the field of organic herbs, had his interest in essential oils kept growing by the day.
- His interest in herbs & oils made him traverse the length and the breadth of the country and made himself intensively engaged with the local communities dealing in Organic Essential Oils Cultivation.
- Having visited and worked with communities for about 7 years, he realized certain serious problems being faced by indigenous growers such as lack of scientific approach to cultivation, availability of fair and transparent market for the cultivators and absence of availability of trusted and transparent sourcing markets to the end users.
- Having a deep desire to help the cultivators and provide a fair marketplace for Essential Oil Community, he led the foundation of AYUROMA CENTRE in a small office at Kanpur in the year 2006 with the help of fund pooled by local cultivators and farmers of raw material for Essential Oils.

Who We Are

We, Ayuroma Centre take pleasure to introduce ourselves as the leading manufacturers & exporters of Essential Oils and allied products. We are one of the largest producers of Carrot Seed Oil, Frankincense Oil, Cypril Oil, Vetiver Oil and Ginger Oil. In addition, we also have capability to produce products as per customer's requirements.

Vision

We envision to become the world's leading company in Essential Oils and beyond, with Global Focus, meanwhile staying committed to our customers, & value creation for all the stakeholders involved.

Mission

To constantly innovate and deliver the benchmarked quality products, hence enabling our customers to complete and succeed in their business.

Aim

In 2006, we began with a dream & ambition – That of Filling the World with the Essence of Nature.

Our ambition took shape year by year with the hard work & determination of our supportive team. We have been spreading trust through lasting Essence of Aroma for last 17 years of the world.

We have the capacity of processing over 6 metric tons raw material per day. Our in-house laboratory is equipped with modern machineries like Gas Chromatography Mass Spectrometry (GC-MS) equipped with Headspace sampler, Gas chromatograph with polar and non-polar columns to ensure that the highest level of quality is consistently maintained in the products, which we produce & deliver to domestic & international customers.
