Company Introduction

With Pleasure we introduce ourselves, **Sharva International**, a sister concern of VAC Group, a 25 years old Pharma API Company and a leading player in the industry. We are specialized in Distribution of quality Bulk Drugs, Ready-mix Pellets, Chemicals Enzymes & Excipients, Food Additives , API's and are poised to achieve excellence on strength of its skilled and motivated team, concern for safety, health, environment and commitment to do business with ethics.

Value creation for our customers is at the core of what we do. We achieve this through partnership with our customers and supporting them in meeting their goals in terms of quality, time and costs. Based in New Delhi, we have made our presence felt in the highly competitive field of APIs and intermediates, by offering customers the highest quality, cost-competitive products with a short period of time.

Quality Policy

Sharva International is committed to the delivery of safe and effective products to all its consumers, a fundamental element of our company's purpose and mission.

Probiotics are live microorganisms that provide health benefits when consumed, generally by improving and restoring the gut flora and are considered to be safe to consume.

LACTOBACILLI STRAINS:

- ❖ *Lactiplantibacillus plantarum*
- ❖ *Lacticaseibacillus rhamnosus*
- ❖ *Lactobacillus acidophilus*
- ❖ *Lactobacillus bulgaricus*
- ❖ *Lacticaseibacillus casei*
- ❖ *Limosilactobacillus fermentum*
- ❖ *Lactobacillus gasseri*
- ❖ *Lactobacillus helveticus*
- ❖ *Lactobacillus johnsonii*
- ❖ *Lactobacillus lactis*
- ❖ *Lacticaseibacillus paracasei*
- ❖ *Limosilactobacillus reuteri*
- ❖ *Levilactobacillus brevis*
- ❖ *Ligilactobacillus salivarius*

BIFIDOBACTERIUM STRAINS:

- ❖ *Bifidobacterium longum subsp. Longum*
- ❖ *Bifidobacterium breve*
- ❖ *Bifidobacterium animalis subsp. lactis*
- ❖ *Bifidobacterium longum subsp. infantis*
- ❖ *Bifidobacterium bifidum*

STREPTOCOCCUS & ENTEROCOCCUS STRAINS:

- ❖ *Streptococcus thermophilus*
- ❖ *Enterococcus faecalis (Streptococcus faecalis)*
- ❖ *Pediococcus acidolactici*
- ❖ *Enterococcus faecium*

BACILLUS STRAINS:

- ❖ *Bacillus coagulans*
- ❖ *Bacillus clausii*
- ❖ *Bacillus subtilis*
- ❖ *Bacillus mesentericus*
- ❖ *Bacillus licheniformis*
- ❖ *Bacillus polymyxa*
- ❖ *Bacillus megaterium*

SACCHAROMYCES STRAINS:

- ❖ *Saccharomyces boulardii*
- ❖ *Saccharomyces cerevisiae*

**CUSTOMIZED PROBIOTIC BLENDS
FOR HUMAN
&
ANIMAL HEALTHCARE :**
As per client's requirement

ENZYMES

Enzymes are large biomolecules required for the numerous chemical interconversions that sustain life. These are generally known as "Biocatalyst."

They are highly efficient and can increase reaction rates by 100 million to 10 billion times faster than any normal chemical reaction.

Enzymes are highly selective catalysts which can greatly accelerate both the rate and specificity of metabolic reactions, which range from the digestion of food to the synthesis of DNA. Almost all the chemical reactions in a biological cell need enzymes in order to occur at rates sufficient for life.
