

*Elevating Pharma Brands
with World-Class Contract
Manufacturing.*

Your Global Partner for Pharmaceutical Contract Manufacturing.

We specialize in manufacturing a diverse portfolio of high-quality pharmaceutical formulations. Whether you're launching a new brand or expanding your existing product line, we have the expertise and capabilities to meet your unique requirements.

Respiratory Products

Breathe Easy with Our Precision-Engineered Respiratory Solutions

ABOUT US

At Maya Biotech, we provide high-quality manufacturing for inhalers, injectables, nasal sprays, and ophthalmics. With certified facilities and end-to-end capabilities, we help brands launch winning products worldwide. Our advanced infrastructure, skilled professionals, and top-tier equipment, helps us manufacture premium pharma products while adhering to rigorous quality and safety standards at every step of the process.

Plainly put, we don't just manufacture products; we formulate success. Our cutting-edge solutions and unparalleled expertise empower your brand to not just enter the market, but to dominate it. Partner with us to create pharmaceutical innovations that don't just satisfy customers – they create devoted brand advocates, driving repeat business and long-term growth.

WHAT WE PROVIDE

At Maya Biotech, we specialize in pharmaceutical contract manufacturing, supporting brands in India and globally with products like inhalers, injectables, nasal sprays and ophthalmics.

With expertise in compliance and market demands, we offer custom formulations, private label manufacturing, and packaging solutions to ensure your success.

Contract Manufacturing

Our WHO-GMP certified facilities are equipped to handle your full production needs with precision, ensuring timely and compliant delivery.

Private Label

Partner with us to create standout pharma products under your brand, crafted to meet high industry standards and gain a competitive edge.

Franchise Opportunities

Looking to expand your pharma business? Explore franchise opportunities with Maya Biotech, allowing you to distribute our trusted formulations and products in the Indian market and beyond.

OUR VISION

Maya Biotech strives for a world with easy and safe access to high quality healthcare.

OUR MISSION

Maya biotech is committed towards developing exceptional tailor-made pharmaceutical solutions, backed by advanced research and technology.

OUR PROCESS

1.

Understand Market Requirements

Our team analyzes the Indian pharmaceutical landscape and global market trends to create formulations that align with your target audience and regulatory needs.

2.

Select or Customise Formulations

Leverage our extensive library of proven formulations, compliant with Indian regulations and ready for immediate private labelling.

3.

Decide Packaging Specifications

We help you choose the right packaging that not only protects the product but also enhances its market appeal, while ensuring it complies with industry standards.

4.

Finalize Pricing

Our pricing strategy is transparent and competitive, ensuring you receive high-quality products at an optimal cost without compromising on safety or compliance.

5.

Production & Packaging

With our advanced manufacturing facilities, we guarantee production efficiency and packaging that meets global safety and quality standards.

6.

Delivery within 45-60 days

Launch with confidence, knowing your finished product will be delivered within 45-60 days from order confirmation. Moreover, our trusted logistics network ensures safe and timely delivery to any location across and outside India.

DRY INJECTIONS

**Pioneering Solutions for Critical
Care and Antimicrobial Therapy**

DRY INJECTIONS

The Art and Science of Dry Injection Formulation

Dry injections, also known as lyophilized or freeze-dried injections, are far more than just powders in vials. They are complex systems requiring a deep understanding of:

Lyophilization Expertise:

Precise control over freezing temperatures, vacuum pressure, and drying times is crucial for preserving drug stability and ensuring optimal reconstitution.

Sterility Assurance:

Stringent aseptic techniques and rigorous environmental monitoring are paramount throughout the manufacturing process to guarantee sterility.

Particle Size Optimization:

Micronization and milling processes must be carefully controlled to achieve the desired particle size distribution for optimal reconstitution and injection.

Consistent Quality and Regulatory Compliance

At Maya Biotech, we adhere to stringent regulatory standards, ensuring that our dry injections meet the requirements of global and Indian regulatory authorities.

Every batch undergoes comprehensive quality checks for sterility, potency, and safety, making our products reliable solutions for healthcare providers across the globe.

DRY INJECTIONS

CEPHALOSPORIN, CARBAPENEM & LYOPHILIZED POWDER

Acyclovir Sodium Injection	Ceftriaxone Injection
Anidulafungin for Injection	Ceftriaxone + Sulbactam Injection
Aztreonam for Injection	Ceftriaxone + Tazobactam Injection
Cefazolin Injection	Cefuroxime Sodium Injection
Cefepime Injection	Cefuroxime + Sulbactam Injection
Cefepime + Sulbactam Injection	Daptomycin for Injection
Cefepime + Tazobactam Injection	Doripenem Injection
Cefaperazone Injection	Ertapenem Injection
Cefaperazone + Sulbactam Injection	Fosfomycin Sodium for Injection
Cefpirome Injection	Imipenem + Cilastatin Injection
Cefpirome + Sulbactam Injection	Meropenem Injection
Ceftazidime Injection	Meropenem + Sulbactam for Injection
Ceftazidime + Sulbactam Injection	Meropenem and Tazobactam for Injection
Ceftazidime + Tazobactam Injection	Micafungin Sodium for Injection
Ceftizoxime Injection	Minocycline for Injection
Cefaperazone + Tazobactam Injection	Thiopentone Injection
Cefotaxime Sodium Injection	

DRY INJECTIONS

GENERAL

Artesunate for Injection	Hydrocortisone Sodium Succinate Injection
Capreomycin Injection	Lansoprazole for Injection
Colistimethate Sodium for Injection	Methylprednisolone Sodium Succinate for Injection
Chloramphenicol Sodium Succinate Injection	Omeprazole for Injection
Ceftizoxime for Injection USP 250 mg	Pantoprazole for Injection
Cerebroprotein Hydrolysate for Injection 30 mg	Piperacillin & Tazobactam Injection
Clarithromycin for Infusion BP 500 mg	Polymyxin B for Injection
Clarithromycin for Infusion BP 500 mg	Raberprazole for Injection
Colistimethate Sodium for Injection I.P. 1 million IU	Streptokinase Injection
Desferrioxamine Injection I.P. 500 mg	Streptomycin Injection
Dexrazoxane for Injection	Teicoplanin Injection
Doxycycline for Injection	Tigecycline for Injection
Esomeprazole for Injection	Urokinase for Injection
Ganciclovir Injection	Ullinastatin for Injection
Glutathione for Injection	Vancomycin for Injection
	Voriconazole for Injection

LIQUID INJECTIONS

**Advanced Solutions for
Precision Treatment**

LIQUID INJECTIONS

The Art and Science of Liquid Injection Formulation

At Maya Biotech, our liquid injections are formulated to address a broad range of medical needs, from critical care treatments to anesthetic solutions. With a focus on safety, efficacy, and compliance with global standards, our liquid injections are manufactured using cutting-edge technology to ensure sterility and precision.

Liquid injections are the backbone of modern healthcare, delivering life-saving drugs with unmatched precision. At Maya Biotech, we've mastered the intricate balance of ingredients and techniques to create injections that are:

We create injections that are:

- Highly Stable
- Optimally Soluble
- Precisely pH-Adjusted
- Sterile and Endotoxin-Free
- Formulated for Targeted Delivery
- Engineered for Patient Comfort

Consistent Quality and Regulatory Compliance

At Maya Biotech, we adhere to stringent regulatory standards, ensuring that our dry injections meet the requirements of global and Indian regulatory authorities.

Every batch undergoes comprehensive quality checks for sterility, potency, and safety, making our products reliable solutions for healthcare providers across the globe.

Sterile Manufacturing

LIQUID INJECTION

GENERAL

Aprotinin Injection	Chlorpheniramine Maleate Injection
Alprostadil Injection	Chloroquine Phosphate Injection
Ascorbic Acid Injection	Clonidine Injection
Amikacin Injection	Calcium Folate Injection
Artemether Injection	Cisatracurium Besylate Injection USP 2 mg/ml
Acetylcysteine Solution	Diclofenac Sodium Injection
Atracurium Besylate Injection	Diclofenac Sodium Injection 75 mg/ml
Aminocarproic Acid Injection	Dicyclomine Injection I.P. 10 mg/ml
Adrenaline Injection I.P. 1 mg/ml	Dexmedetomidine Injection
Aceclofenac Injection 150 mg/ml	Dexketoprofen Injection
Amiodarone Intravenous Infusion I.P. 50 mg/ml	Dopamine Injection
Amphotericin B Injection I.P. 50 mg	Dimercaprol Injection
Atropine Sulphate Injection	Disodium Edetate Injection
Betamethasone Injection I.P. 4 mg/ml	Desferrioxamine Injection
Calcium Gluconate 50 mg and Calcium Lactobionate 9 mg Injection	Drotaverine HCl Injection 40 mg/2ml
Cyanocobalamin with Multi Vitamins Injection	Doxofylline Injection
Citicoline Injection	Edaravone Injection 30 mg/20 ml
Clindamycin Injection	Enoxaparin Sodium Injection
Cholecalciferol Injection	Esmolol Injection
Cyanacobalamin Injection	Ethamsylate Injection
Chlorpromazine Hydrochloride Injection	Etomidate Injection
	Etophylline 85.7 mg & Theophylline 25.3 mg Injection

LIQUID INJECTION

GENERAL

Eptifibatide Injection	L-Alanyl-L-Glutamine Solution for Infusion
Furosemide Injection	Magnesium Sulphate Injection
Fluorescein Injection	Mannitol Injection
Fluphenazine Decanoate Injection	Methycobalamin Injection
Flupentixol Injection	Methycobalamin with Multi Vitamins Injection
Gentamicin Injection	Mecobalamin, Pyridoxine HCL and Nicotinamide Injection
Glycopyrrolate 500 mcg & Neostigmine Methylsulphate 2500 mcg Injection	Methylprednisolone Acetate Injection
Hyaluronic Acid Sodium Salt Injection	Mecobalamin Injection 500 mcg/ml & 1000 mcg/ml
Hydroxocobalamin Injection	Mecobalamin 1500 mcg, Folic Acid 0.7 mg & Niacinamide 12 mg Injection
Hyoscine Butylbromide Injection	Mecobalamin 1500 mcg, Thiamine 10 mg, Vitamin B6 3 mg, Folic Acid 10 mg & Niacinamide 48 mg, D-Panthenol 50 mg Injection
Hydralazine Hydrochloride Injection	Milrinone Lactate Injection
Isepamicin Injection	Nandrolone Decanoate Injection
Indomethacin for Injection	Nandrolone Phenyl Propionate Injection
Iron Dextran Injection	Netilmicin Sulphate Injection
Iron Sucrose Injection	Nimodipine Infusion
Iron Sorbitol Citric Acid Complex Injection	Nandrolone Phenylpropionate Injection I.P. 25 mg & 50 mg
Iron Sorbitol Citric Acid Complex with Folic Acid & Vitamin B12 Injection	Nicardinepine Hydrochloride Injection
Ketorolac Tromethamine Injection	
Levocarnitine Injection	
L-ornithine-l-aspartate Infusion	

LIQUID INJECTION

GENERAL

Octreotide Acetate Injection	Sildenafil Citrate Injection
Ondansetron Injection	Sterile Co-Trimoxazole Concentrate BP
Piracetam Injection	Sodium Valporate Injection I.P. 100 mg
Piroxicam Injection	Suxamethonium Chloride Inj I.P.
Phytomenadione Injection	(Succinylcholine Injection I.P) 50 mg/ml
Propranolol Injection	Terbutaline Injection I.P. 500 mcg/ml
Potassium Chloride for Injection	Terlipressin Injection
Protamine Sulphate Injection	Thiamine Injection
Palonosetron Hydrochloride Injection	Thiocolchicoside Injection
Prochlorperazine Injection	Tranexamic Acid Injection
Prednisolone Sodium Phosphate Injection I.P. 40 mg	Triamcinolone Acetonide Injection
Procainamide Hydrochloride Injection I.P. 100 mg	Tobramycin Sulphate Injection
Quinine Dihydrochloride Injection	Verapamil Injection
Rocuronium Bromide Injection	Vitamin C Injection I.P. 150mg & Methylcobalamin 2500 mcg, Folic Acid 0.7mg & Niacinamide 12mg Injection Combipack
Ritodrine Injection	Zuclopenthixol Acetate Injection
Salbutamol Injection	Zinc Chloride Injection I.P. 1 mg/ml
Sodium Nitrite Injection	Zuclopenthixol Acetate Injection I.P.
Sodium Thiosulphate Injection	Zuclopenthixol Decanoate Injection BP
Sodium Bicarbonate Injection	Zuclopenthixol Acetate Injection I.P.
Stanozolol Injection	

METERED DOSE INHALERS

**Precision Formulations for
Respiratory Care**

METERED DOSE INHALERS

Precision formulations for Respiratory Care

In a sector where precision can make or break a product's efficacy, we go above and beyond to ensure that every inhaler meets the highest global standards. Our rigorous testing protocols ensure that each device delivers:

- Consistent and accurate dose delivery
- Optimal aerosol particle distribution
- Superior pulmonary drug absorption
- Stable actuation performance
- Reliable priming and repriming characteristics
- Uncompromised product stability over time

We create inhalers that are:

- Highly Stable
- Optimally Soluble
- Precisely pH-Adjusted
- Sterile and Endotoxin-Free
- Formulated for Targeted Delivery
- Engineered for Patient Comfort

Consistent Quality and Regulatory Compliance

With over a decade of expertise in inhaler formulations, our team of experts ensures each product adheres to the strictest regulatory standards, including Global and local guidelines.

We follow comprehensive testing protocols to ensure consistent quality, efficacy, and safety in every batch.

OPHTHALMIC DROPS

**Comprehensive Solutions for
Eye and Ear Care**

OPHTHALMIC DROPS

Comprehensive Solutions for Eye Care

At Maya Biotech, we offer a broad range of ophthalmic and ear solutions designed to meet the highest standards of quality and effectiveness. Our products are developed to treat various eye conditions, including infections, inflammation, and glaucoma, ensuring that patients receive the best possible care.

Ophthalmic solutions are not just liquids in a bottle – they're intricate systems requiring precise formulation. Our products are the result of extensive research and development, balancing:

What it takes to be world-class in Ophthalmic Solution manufacturing?

- Unmatched Dose Uniformity
- Optimal Ocular Bioavailability
- Ideal Viscosity and Rheology
- Consistent pH and Osmolarity
- Superior In Vitro Dissolution Profiles
- Uncompromised Preservative Efficacy

Consistent Quality and Regulatory Compliance

At Maya Biotech, we ensure that all our ophthalmic and ear products meet the strictest global standards, including global and Indian regulatory guidelines.

Every batch is subjected to rigorous quality control to guarantee safety, efficacy, and consistency.

NASAL SPRAY & DROPS

**Trusted formulations so you
can breathe easy**

NASAL SPRAYS & DROPS

Complex systems requiring precise engineering.

In an industry where precision is paramount, we go above and beyond. Our rigorous testing protocols exceed regulatory requirements, ensuring that every spray from our products delivers:

- Cutting-edge Active Pharmaceutical Ingredients (APIs)
- State-of-the-art Preservative Systems
- Optimized Buffer Solutions
- Advanced Tonicity Adjusters
- Innovative Viscosity Modifiers
- Specialized Solubilizers
- Proprietary Spray Pattern Enhancers

Microemulsion Technology

Advanced Thermosensitive Gelling Systems

Cyclodextrin Complexation

Nanoparticle Delivery

Preservative-Free Systems

Every spray from our product delivers:

- Unmatched Dose Uniformity
- Optimal Spray Pattern and Plume Geometry
- Ideal Droplet Size Distribution
- Consistent Priming and Repriming Performance
- Superior In Vitro Dissolution Profiles
- Uncompromised Preservative Efficacy

Consistent Quality and Regulatory Compliance

Our team has been perfecting nasal spray formulations for over a decade. Our researchers and experts are skilled in navigating the complex landscape of nasal drug delivery.

We rigorously adhere to global and local regulatory guidelines. Our formulations undergo extensive testing to ensure they meet or exceed all required standards for safety, efficacy, and quality.

Unwavering Safety

- Minimal Side Effects
- Proven Long-Term Tolerability

Superior User Experience

- Intuitive Administration
- Comfort-Focused Design

Unrivaled Efficacy

- Precision Drug Delivery
- Maximum Absorption
