McW Healthcare (P) Ltd.

Innovating for Better Healthcare

INNOVATION

in Healthcare Solutions
Our Business Model

We are a leading, integrated pharmaceutical formulation development, manufacturing, and marketing company. McW is committed to fulfilling unmet medical needs through a comprehensive pharmaceutical network stretching across the world. Since our inception 35 years ago, we have expanded our product portfolio and operations year after year. We are currently present in more than 45 countries worldwide, with robust formulation development, production, export, sales, and distribution infrastructure.

Each of our products reflects our uncompromising quality standards-ensuring reliability, efficacy, and consistency.

Our unwavering commitment to quality enables us to fulfill large-scale orders swiftly, while consistently meeting or exceeding the industry's highest benchmarks.

Among the various therapeutic segments, our key focus areas in OTC & prescription formulations are Probiotics, Anti-malarials, Thrombocytopenia, Nutraceuticals, Diabetes, Pain Management, Anti-tussive, Paediatric, and Gynaecology products among others.

STAR EXPORT HOUSE IN PURSUIT OF EXCELLENCE

**WHO GMP Approved Unit
and ISO 1901: 1500 Company**

STAR EXPORT HOUSE EFFICIENT REGULATORY AFFAIRS DEPARTMENT

Our RA team has an extensive experience in handling registrations, documentation and stringent regulatory submissions required by the regulators in different countries needed for new product approvals. We have 100+ registrations in various countries around the globe. The ability of our RA team to provide CTD & ACTD dossiers quickly help us to get faster approvals and gives us a cutting edge in getting early approvals in countries we wish to operate in.

McW Healthcare a leading Pharmaceutical Contract Development and Manufacturing Organization (CDMO) and a branded* formulation marketer in India, is growing rapidly by investing in technology and capabilities, with a scalable, sustainable business model. With a legacy of 35 years, and having introduced many novel, innovative products, we enjoy an enviable presence in various therapeutic segments of the Pharma market. We are sensitive to the specific needs of our valued customers and provide end to end solutions to meet their requirements. Our unwavering commitment to meet unserved patient needs across the globe, inspires us to formulate and market a wide range of value-added products. This innovative, vast product portfolio helps us fulfill the needs of most medical specialties. Our consistent success in different markets is a result of our strong R&D capabilities in finished product development in different dosage forms by designing robust formulations. Our business development team is committed to establish and maintain long-term strategic alliances with global partners to facilitate licensing of our different products in international markets. We have approvals granted for operations in 45 countries and our business includes providing branded products in India and Emerging Markets of Asia, Africa and Latam countries. We are committed to keep this business growing by expanding geographically and also by establishing new partnerships, alliances, joint ventures or subsidiaries across global markets.

Our Guiding Principles

VISION

To become a world-class manufacturer and marketer of innovative, effective, value added, global quality pharmaceutical and cosmeceutical products, with a significant presence in both India and in International markets.

MISSION

To manufacture quality products while upholding their affordability

To develop and market pharmaceutical products aimed at preventing and curing diseases

To continuously upgrade ourselves to meet the evolving needs and expectations of our consumers

VALUES

Adopting quality as a way of life

Customer centricity

Harnessing innovation to create impactful healthcare solutions

Striving for excellence in everything we do.

Pursuing sustainability and social good in all our corporate actions

Excellence Recognised

Brand of the Year Award

Recognised for

- WHO-GMP (Good Manufacturing Practices)
- GDP (Good Distribution Practices)
- GLP (Good Laboratory Practices)

Excellence Award (MSME)

DIVERSIFIED AND QUALITY COMPLIANT MANUFACTURING CAPABILITIES

Our operations are supported by state-of-the-art manufacturing units that produce a wide range of formulations across multiple dosage forms, including oral solids (tablets and capsules), oral liquids, topicals, and injectables.

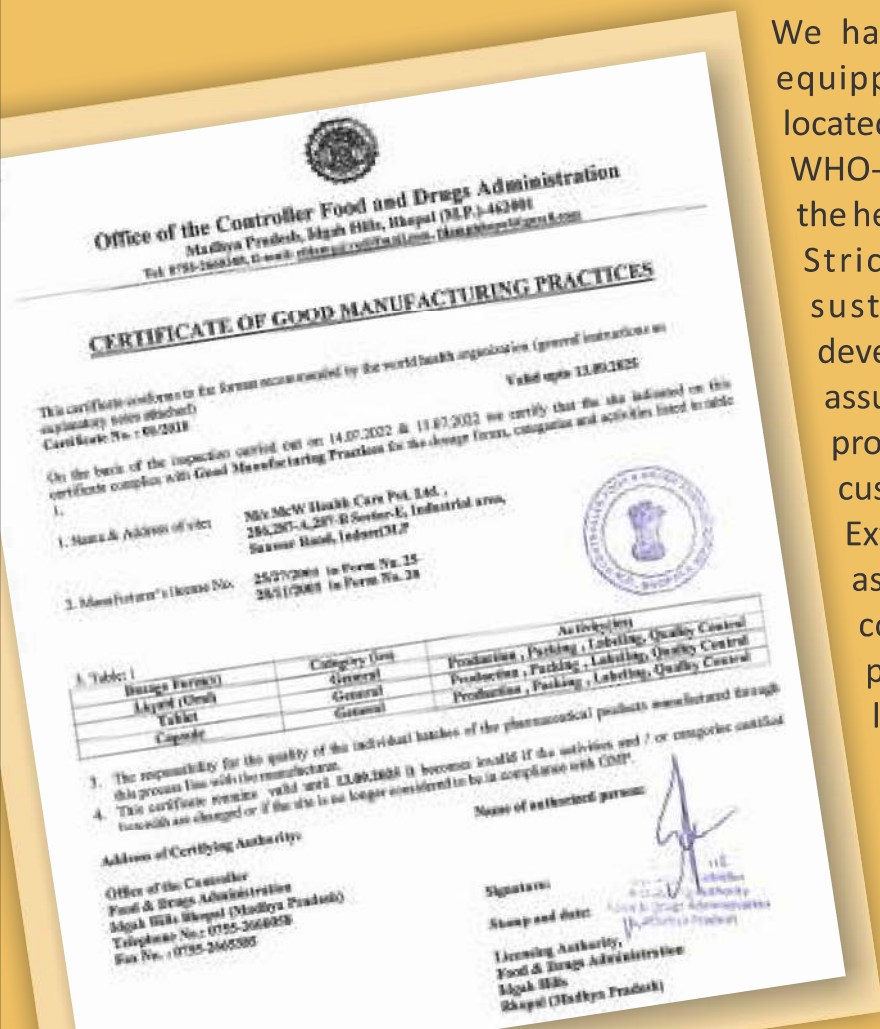

We maintain world-class quality for our products and services across domestic and overseas markets, thereby ensuring that every patient that we reach, has access to the most effective, value-for-money medicines in the world.

WHO GMP CERTIFIED FACILITY STRICT COMPLIANCE TO NORMS Well Controlled Manufacturing Process

We have a world-class manufacturing plant equipped with state-of-the-art technology, located in Indore. In addition to the prestigious WHO-GMP certification, our plant is approved by the health authorities of 45 countries.

Strict adherence to cGMP* norms and sustained improvement in formulation development, production processes, quality assurance protocols, and skill sets help us to produce the finest quality products for our customers.

Extensive R&D and stringent on-site quality assurance systems ensure the production of consistently high-quality pharmaceutical products suitable for global supply. The latest and most sophisticated scientific instruments are used by highly qualified and experienced scientists to conduct qualitative and quantitative analyses, ensuring the highest standards in quality control.

PLANT CAPACITY

Our well equipped, modern manufacturing facility is fully capable of meeting any large-scale production demand, due to which we can deliver on any large order in shortest possible time, thus matching best industry practices. Our current production capacity* per month is as follows:

* Considering working in a single shift

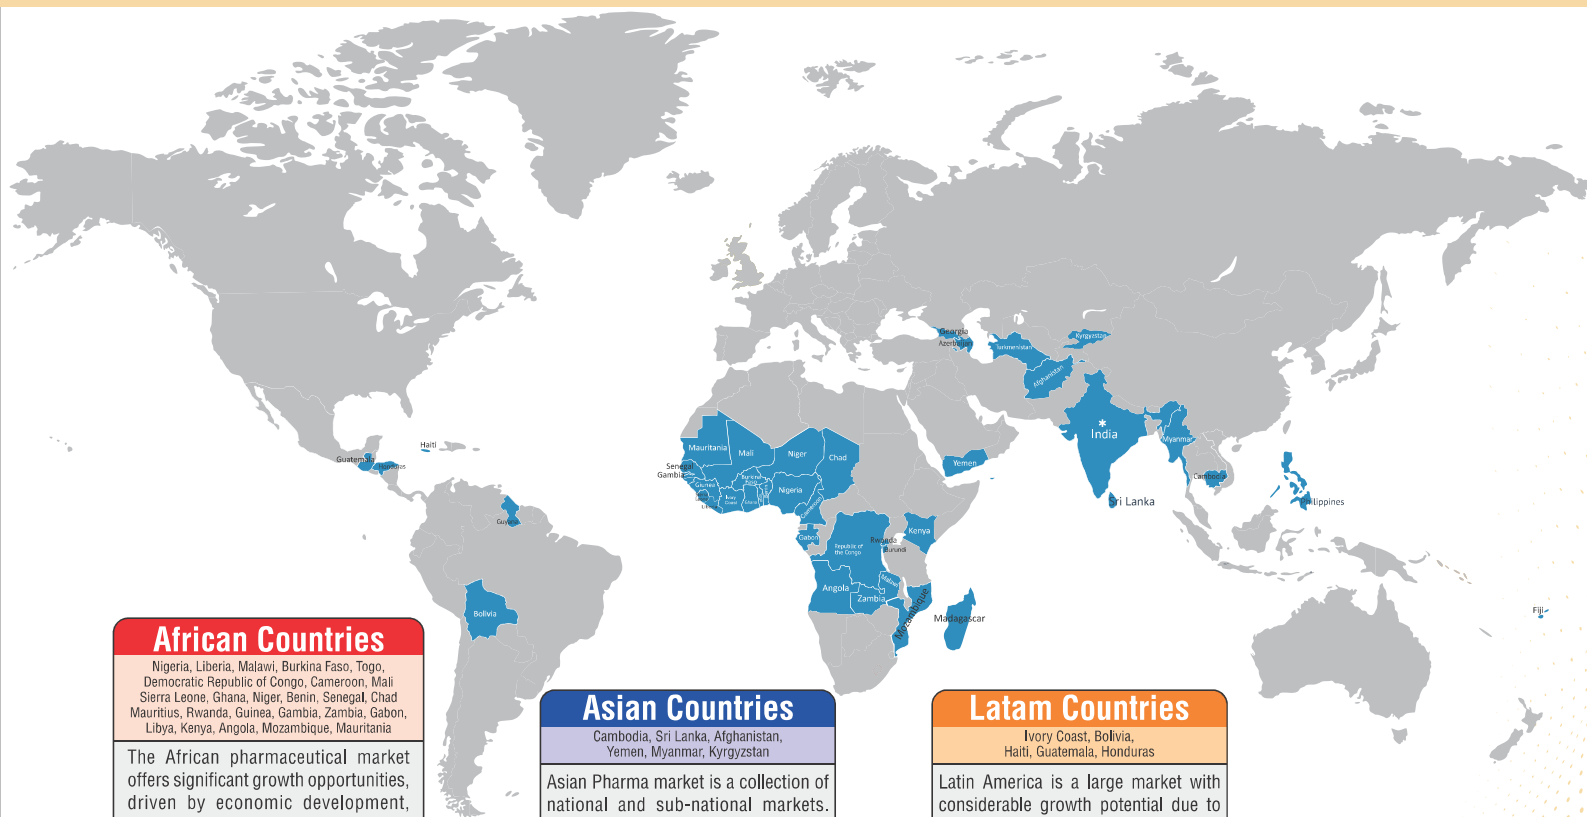

S.No.	Section	Capacity per month
1	Tablets	100 Million
2	Liquid orals	2.4 Million Bottles
3	Capsules	25 Million

STATE OF THE ART MANUFACTURING PLANT

1. Meticulous production planning and monitoring besides strict adherence to industry best practices and regulatory compliance, contributes to stringent process control.
2. Our highly trained, and dedicated production team with a rich experience led by operations experts. Competent scientists are engaged in formulation development and analytical development.
3. Much more than control or assurance, quality is a way of life at McW. Every product manufactured undergoes stringent quality checks and quality analysis before it is introduced in the market.
4. Our Quality Control and Microbiology departments are equipped with the latest, most sophisticated instruments like HPLC, UV spectrophotometer, Flame Photometer, Dissolution /Friability test apparatus, Disintegration tester, Analytical balances, etc.
5. All products including those involving liquid manufacturing, automatic bottle filling, granulation, compression, and coating are manufactured using highly efficient machines. Matching with our international recognition we have global expansion plans.

In order to expand our global footprint McW has entered into strategic tie-ups and joined hands with key players in the following international markets

African Countries

Nigeria, Liberia, Malawi, Burkina Faso, Togo,
Democratic Republic of Congo, Cameroon, Mali,
Sierra Leone, Ghana, Niger, Benin, Senegal, Chad,
Mauritius, Rwanda, Guinea, Gambia, Zambia, Gabon,
Libya, Kenya, Angola, Mozambique, Mauritania

The African pharmaceutical market offers significant growth opportunities, driven by economic development, population growth, urbanization, a growing middle class, and increasing demand for healthcare products and services. Intensifying competition, regulatory barriers, and limited access to funding are the restraining factors.

We at McW can help address product development, registration, pricing supply and distribution challenges, and can help marketers in serving starkly different African country markets successfully.

Asian Countries

Cambodia, Sri Lanka, Afghanistan,
Yemen, Myanmar, Kyrgyzstan

Asian Pharma market is a collection of national and sub-national markets. Disease burdens, regulations, distribution networks, reimbursement policies and patient preferences vary widely, even within countries. Product and marketing strategies may need to be tailored to the specific countries and that's where we can help.

We can help by providing Value for money products and dosage forms matching with target country's specific requirements, and by giving regulatory and physician promotion support.

Latam Countries

Ivory Coast, Bolivia,
Haiti, Guatemala, Honduras

Latin America is a large market with considerable growth potential due to aging populations, increased incidence of chronic diseases, rising affordability, and increased government spending. The Latam countries have an evolving regulatory landscape with very active health authorities, tighter country-specific and regional regulatory requirements. McW can help by providing both the country and region-specific product packaging, dosage-forms and formulations and support for regulatory filings.
