ABOUT AMISHA VINYLs

Amisha Vinyls inherited a rich legacy, beginning as a trading unit in the 1960s under the late **Shri Baikunth Nath Bhargava**. With over three decades of experience in the PVC film business, the late **Shri Bhasker Bhargava** ventured into manufacturing PVC films in **1997**, establishing Amisha Vinyls.

From a humble beginning with a single calendaring line, and under the astute leadership of **Mr. Pranay Bhargava**, we have grown to become India's largest manufacturer of PVC films. Today, we operate three calendaring lines dedicated to rigid PVC and two for flexible PVC films. To further our goal of becoming the preferred supplier for pharmaceutical packaging, we commissioned a state-of-the-art **PVDC coating plant** in 2025. Today, we are a one-stop shop for pharmaceutical packaging, offering PVC, PVDC, TRIPLEX, TWINLAM, QUADLAM, and other allied packaging materials.

This is just the beginning. Our quest for development is ongoing; in collaboration with pharmaceutical manufacturers, we continuously seek newer products, especially for pharma packaging, to offer enhanced barrier properties.

Amisha Vinyls operates four units: three in **Daman** and a new, state-of-the-art manufacturing unit in **Valsad, Gujarat**. We have a pan-India network with our head office in Mumbai, sales offices in Delhi, Kolkata, and Bangalore, and resident managers in various other locations.

We believe in a customer-first policy, and our growth is a testament to this commitment.

RIGID PVC THERMOFORMING BLISTER FILM

AMISHA MONO RIGID PVC FILM

AMISHA – MONO RIGID PVC FILM is Pharmaceutical Grade RIGID PVC Film with High Clarity, Thermoforming & Sealing properties.

- Suitable for Packaging Pharmaceutical Tablets, Capsules, Injections, Ampoules, Vials etc.
- Suitable for Vacuum Forming Ampoules, Vials Trays, Food Trays
- Better yield complying with global regulatory requirements exclusively for pharmaceutical blister packaging
- Excellent thermoforming and sealing characteristics
- Superior aesthetics & clarity
- Non Toxic

AMISHA MONO STANDARD PVC MICRON
