WHERE VISIONARY PHARMA THRIVES

WHY USE MULTIPLE SOFTWARE SYSTEM WHEN YOU CAN USE JUST ONE?

COMPLEXITY

Managing multiple systems increases complexity, integration challenges, and synchronization issues.

DATA INTEGRITY

Using multiple systems raises the risk of data discrepancies, errors, and inconsistencies.

INTEGRATION EFFORTS

Integrating multiple systems requires extra resources, time, and lead to compatibility problems.

USER EXPERIENCE

Working with multiple interfaces and software leads to a fragmented user experience and reduced productivity.

MAINTENANCE & SUPPORT

Maintaining and supporting multiple systems demands additional resources and costs.

KEY BENEFITS OF A UNIFIED ERP SYSTEM

STREAMLINED OPERATIONS

Consolidate functions for a holistic view, simplified work flows, and optimized processes.

DATA CONSISTENCY

Ensure accuracy and eliminate errors by using a single system for data management.

ENHANCED EFFICIENCY

Seamlessly integrate modules to eliminate duplication and improve operational efficiency.

IMPROVED DECISION MAKING

Real-time data access and comprehensive reporting facilitate informed decisions.

COST SAVINGS

Reduce licensing, maintenance, and integration costs while streamlining support efforts.

ERP IS INDUSTRY NEUTRAL, SCALABLE AND AGILE

What Problems Are We Trying To Solve?

Productivity

Resource utilization

Rigidness of Software

Communication

Manual works to decision making

Reducing Direct and Indirect Expenses

Offline document movement

Reducing human error costs

MANUFACTURING

PharmaVerge's Manufacturing and Production planning module stream lines requisition to QC approval flow and Purchase order accumulation help in reducing cost. Various controls help reduce human errors.

Production Planning

Online Rejection

ENGINEERING

PharmaVerge ERP enables preventive maintenance forecasting based on calendar or usage, with tools to manage breakdown service requests and equipment status. Calibration schedules are fully trackable, ensuring timely and compliant upkeep.

Equipment/Instrument Status management

Calendar-based maintenance forecast

Calibration Calendar

Manual Maintenance Request

Meter-based Maintenance forecast

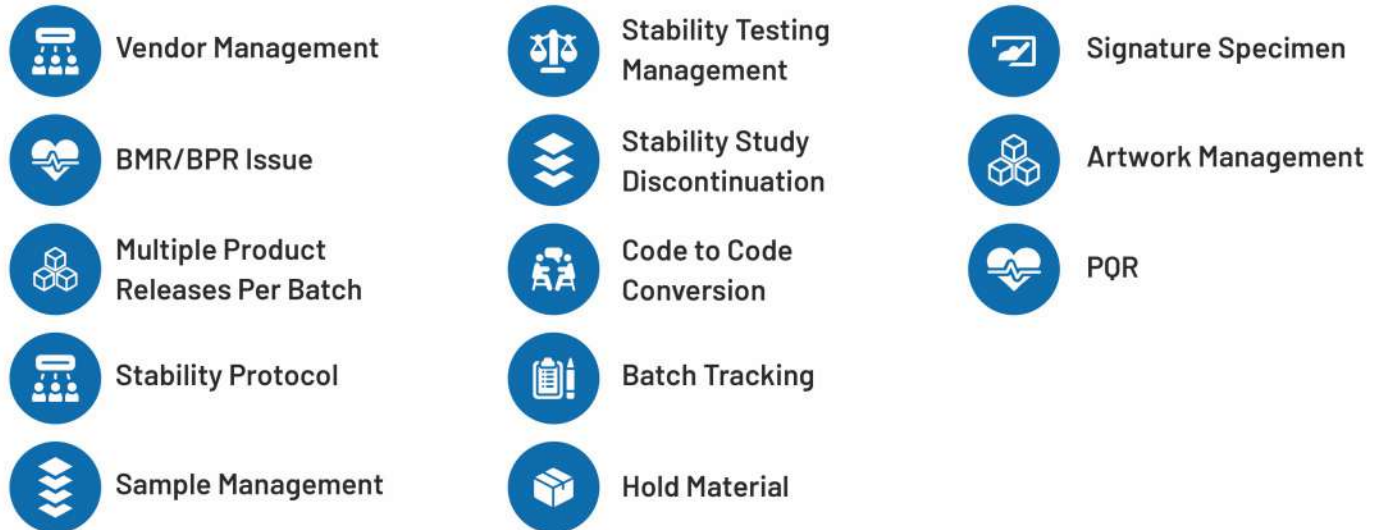

Logging Calibration Activity

ERP EVALUATED BY ROI, NOT JUST COST

QUALITY ASSURANCE

PharmaVerge ERP automates document issuance and register entries, reducing manual workload for QA teams. This allows them to focus on core quality activities while minimizing errors and ensuring compliance.

SOP MANAGEMENT

PharmaVerge ERP streamlines QA workflows by enabling self-issuance of SOPs with full traceability. Built-in approval workflows, digital signatures, and customizable print formats ensure compliance without bottlenecks.

REGULATORY

PharmaVerge ERP simplifies regulatory project tracking by reducing manual status updates and automating task creation through CRM integration. It accelerates setup while maintaining flexibility for manual oversight where needed

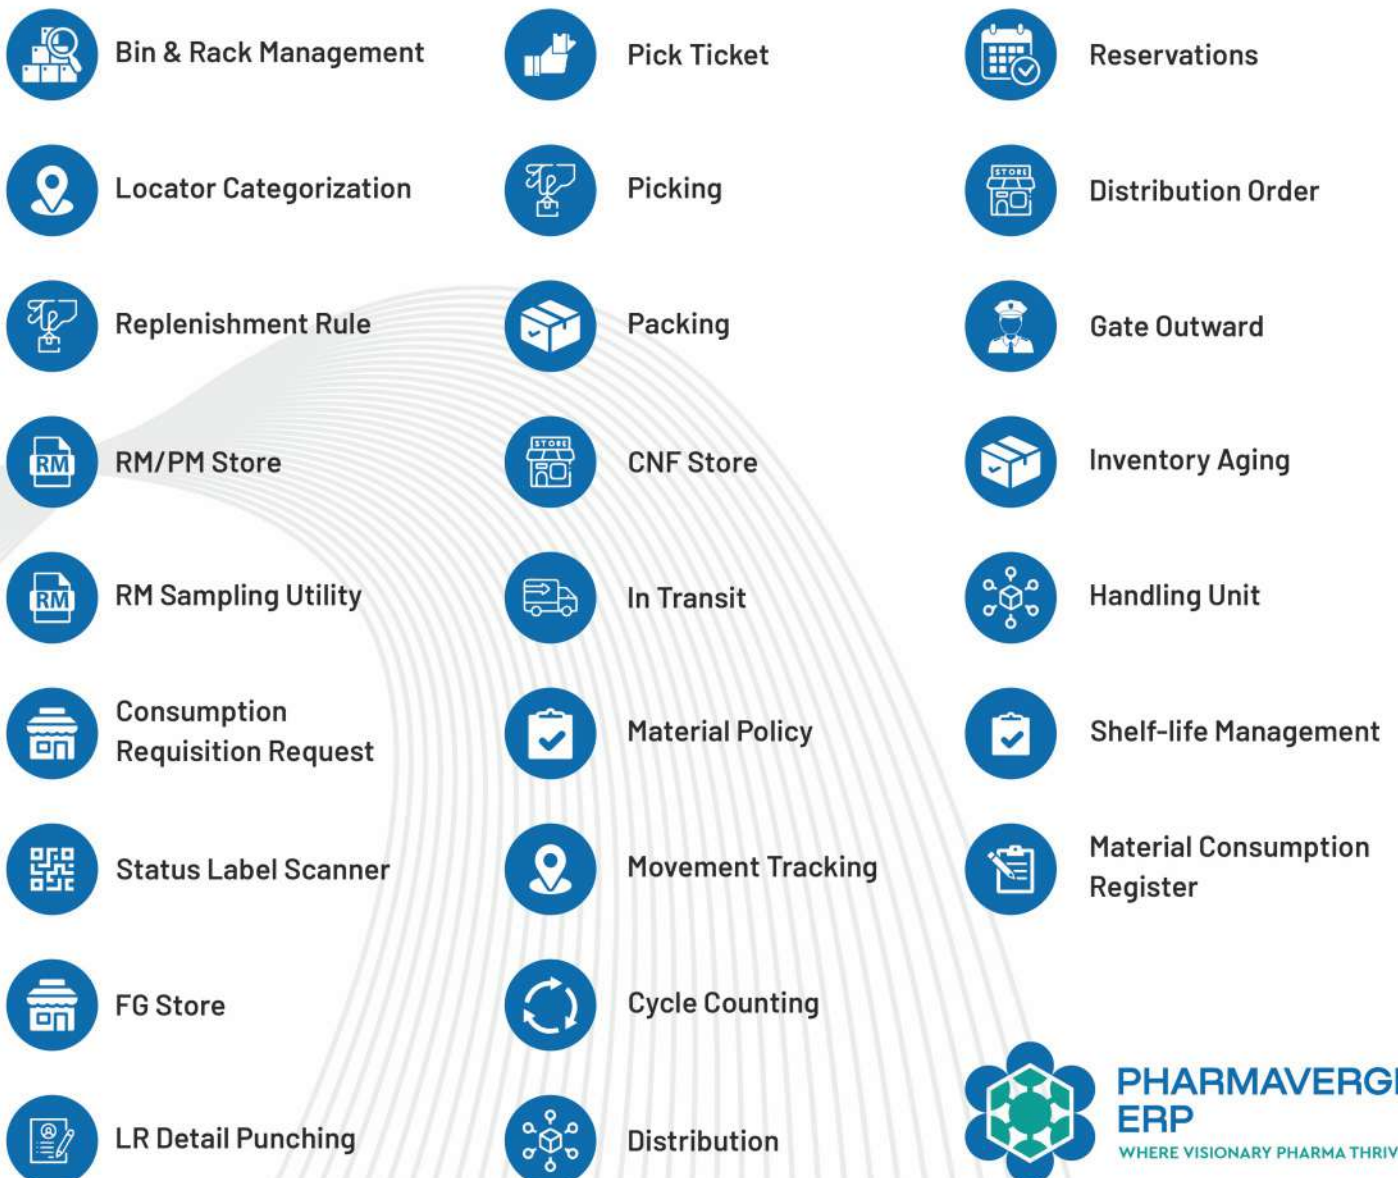

QMS

PharmaVerge ERP digitizes quality documentation with task-driven workflows and secure digital signatures. Processes stay timely, auditable, and fully traceable—eliminating paper clutter and boosting compliance.

INVENTORY MANAGEMENT

PharmaVerge ERP enables precise stock control at bin and rack level, with smart warehouse picking to reduce movement and boost efficiency. Inventory aging and movement analysis support better stocking decisions, while every transaction remains fully traceable by Inward and Batch numbers.

WITH ERP DECISION-MAKING BE EASY

QUALITY CHECK

PharmaVerge ERP digitizes QC workflows with secure digital approvals. raw data, offline work and third party documents management reduce risk of losing paper trail. It ensures tasks follow proper sequence, eliminates paper trails, and reduces effort in maintaining registers and logbooks

 Test Protocol Management	 In-Process Testing	 Logbooks
 Generic Test Protocol	 Water Analysis	 Auto A.R. no. Generation
 General Test Procedure	 F&D Trial Testing	 Skippable Test
 Retention Sample Management	 Outside Testing	 e-DRS
 Inbound Q.C.	 COA	 Process Validation Testing
 Retest Management	 Multiple Test Results	 Media Management
 Product Testing	 Conditionally Approval of COA	 Composition/Retain/Micro Sample Label

HRMS & PAYROLL

PharmaVerge ERP offers built-in HRMS features including leave policies, Leave Approval, expense reimbursement, payroll, shift rostering, holiday calendars, biometric integration, and recruitment—reducing the need for third-party HR software.

 Leave Policy	 Shift Management	 Department and Position Assignment
 Leave Request and Approval	 Shift Rostering	 Recruitment
 Attendance Management	 Tax Regime Selection	 IT Declaration & Approval
 Comp off Request and Approval	 No Business Day Management	 Payroll
 Attendance Regularization	 Salary Structure	 Biometric Integration
