

M/S. NAGINDAS HIRALAL BHAYANI

YOUR TRUSTED PARTNER IN HOSPITAL HYGIENE

Hand, Skin, Equipment, Surface and Environment Disinfectant

Introduction

M/S. Nagindas Hiralal Bhayani the flagship company of Bhayani Group based in Gujarat, India The Group is diversified into different businesses of Manufacturing Chemicals, Pharmaceutical Formulations and Plastic Moulding.

Pharmaceutical Formulation Unit was Incorporated in the Year 2018. Since then, our journey has been a testimony for delivering high-quality, innovative, and reliable product during Covid 19 - Pandemic which made us a leader in the Hospital Disinfectant segment. At our state-of-the-art facility, we specialize in the development, manufacturing, and packaging of a wide range of products , including Hand Rubs , Skin Preparation Solution, Hand and Body Surgical Scrub, Instrument/Equipment and Surface Disinfectants to meet the evolving needs of Doctors, Healthcare providers and Patients.

Our pharmaceutical formulation unit is equipped with the latest technologies and adheres to the highest standards of Good Manufacturing Practices (GMP). We prioritize quality, safety, and efficacy in every product we create, ensuring that our formulations meet rigorous regulatory requirements and industry standards.

Our team of skilled professionals is committed to continuous research and development, allowing us to offer solutions for our customers. With a focus on sustainability and innovation, we aim to contribute to improving global health and the well-being of individuals through accessible, safe, and affordable disinfectant.

At Bhayani Group, we believe in building long-term relationships with our customers, suppliers, and partners, driven by trust, transparency, and excellence. Our factory is a testament to our commitment to quality and to our mission of advancing healthcare through the power of science and technology.

Esteemed Clients & Brands we Manufactured

			
			
			

Manufacturing Capabilities

End-to-End Contract Manufacturing Capabilities :

From research and development to product formulation, packaging development, or Adoption of product via Tech Transfer we offer comprehensive contract manufacturing services.

Private Label Manufacturing Service :

All our products are available Private Labelled to any Hospital, Healthcare Chain, Pharmaceutical Distributor or Retailer.

Tender Service :

Humanitarian Aid Supply, Government Supply. Your Trusted Partner for Rapid Supply During Crisis Situations. Our Highly Agile manufacturing capability along with Backward Integration for Key Raw material and In-House bottle manufacturing is unmatched in the industry.

Bulk Supply of Formulations :

Customers can procure all our products in Bulk packaging and can re-pack the product in its import country.

Quality Assurance :

Rigorous testing and Validations at every stage ensures that your products meet the highest standards of quality and safety.

Global Compliance :

We adhere to regulatory standards across various markets, ensuring smooth market entry. We shall support with all documents required for Import registration.

Application : Handrub

HOSPISURE CHG Handrub

Alcohol-based Handrub for
Hygienic and Surgical Hand Disinfection

Ethanol Alcohol 70% +
2.5% CHG Solution

Composition :

Each 100 ml contains 2.5 ml

Chlorhexidine

Gluconate Solution IP/BP/USP and

70 ml Ethanol IP/BP/USP

Colour : Carmoisine

Salient Features

- Kills bacteria without water
- Broad spectrum and persistent antimicrobial and antibacterial activity
- Enriched with emollient and moisturizer
- Excellent residual & cumulative effects
- Excellent rapid activity
- Good skin tolerance
- Excellent activity in the presence of organic load
- Easy and fast application thus can be used between patients and procedures
- No sink or towel needed thus time saving

Packing Configuration
100 ml, 500 ml, 5000 ml

HOSPISURE Handrub

Mecetronium Ethosulphate and
Alcohol Based Surgical Handrub

2-Propanol, 1-Propanol &
Mecetronium Ethosulphate
Handrub

Composition :

2-Propanol IP 45 gm, 1-Propanol BP 30 gm

Ethyl-hexadecyl-dimethyl

ammonium-ethylsulphate 0.2 gm

(Mecetronium Ethylsulphate)

Colour : Brilliant Blue FCF

Salient Features

- Kills 99.95% microbes in just 30 secs
- Handrub with emollient and moisturizer
- Non-sticky formulation for soft and refreshing feeling
- Easy and fast application thus can be used between patients and procedures
- No sink or towel needed thus time saving
- Easy to use yet effective
- Prolonged residual activity

Packing Configuration
100 ml, 500 ml, 5000 ml

Application : Skin Preparation

HOSPIPREP

Chlorhexidine Tincture
Broad Spectrum Antimicrobial &
Mild on skin

Chlorhexidine & Ethanol Solution

Composition :
Chlorhexidine Gluconate Solution
IP/BP/USP 2.5% v/v
equivalent to 0.5% w/v
Chlorhexidine Gluconate
Ethanol IP/BP/USP 70% v/v

Colour : Carmoisine

Salient Features

- Skin painting and preparation before surgery or Injection
- Rapid Skin antiseptics with residual activity up to 6 hours
- Easy for direct application on skin
- Fast and persistent anti-microbial action
- Effective in preventing CRBSI or CVC colonization
- No human touch required while applying on skin
- Better than Iodine for surgical skin preparation
- Active in presence of organic matter

Packing Configuration
100 ml, 500 ml

HOSPI10

Topical Antiseptic Solution
Povidone Iodine Solution 10%

Composition :
Each ML contains :
Povidone-iodine, IP/BP/USP 100 mg
(equivalent to iodine 10 mg)

HOSPI15

Topical Antiseptic Solution
Povidone Iodine Solution 5%

Composition :
Each ML contains : Povidone-iodine,
IP/BP/USP 50 mg
(equivalent to iodine 5 mg)

Salient Features

- Excellent Antimicrobial Activity
- Good Dermatological Compatibility
- Standard Solution of 2 strengths
- No Pre-treatment of skin
- Identification of treated skin areas to prevent nosocomial infection
- Pre and post-operative skin disinfection
- Disinfection of mucous membranes and damaged skin
- Very stable formulation
- Skin friendly pH

Packing Configuration
100 ml, 250 ml, 500 ml, 1000 ml, 1 gallon

Application : Skin Scrub

HOSPISURE CHG + Scrub

Chlorhexidine Based Surgical Scrub
Excellent Scrubbing and Skin Preparation

Chlorhexidine Gluconate
Solution IP/BP/USP 4% w/v

Composition :

Chlorhexidine Gluconate Solution
IP/BP/USP 20% v/v
(equivalent to Chlorhexidine
Gluconate 4% w/v)

Colour : Carmoisine

Salient Features

- Hospisure CHG + Scrub is a complete Bactericidal, Tuberculocidal, Fungicidal, Hands and Body Wash.
- Maintains water balance on the skin.
- Has a pleasant leave - behind fragrance.
- Promotes compliance with hand washing guidelines.
- Excellent for Fast & effective hand wash & pre-operative body washing before surgery.
- Very compatible for repeated use specially in NICU/OT.

Packing Configuration
100 ml, 500 ml, 5000 ml

HOSPI7.5

Povidone Iodine Based Surgical Scrub
Excellent Scrubbing and
Skin Preparation

Topical Solution IP/BP/USP 7.5 %
(0.75% w/v) Antiseptic

Composition :

Each ML contains:
Povidone-iodine, IP/BP/USP 75 mg
(equivalent to iodine 7.5 mg)

Salient Features

- Broad spectrum microbial coverage
- Cleans and disinfects operative site
- Produces abundant lather and rinses freely
- Excellent skin compatibility due to added emollients to moisturize the skin
- Does not stain hands or fabrics
- High quality and cost effective

Packing Configuration
100 ml, 250 ml, 500 ml, 1000 ml

Application : Surface & Instrument

HOSPISURE Glutamax

High level medical instrument
disinfectant

Glutaraldehyde Solution

Composition :
Each 100 ml contains 2.45 gm
Glutaraldehyde IP

Salient Features

- Broad spectrum antimicrobial activity including Mycobacterium tuberculosis, Reusable solution up to 14 days after activation, suitable for disinfection of thermolabile devices like endoscopes, anaesthesia, dental equipments etc

Packing Configuration
1 Ltr, 5 Ltr

HOSPISURE Opamax

High-level Disinfectant of
Semi-Critical Devices

Ortho-phthalaldehyde Solution

Composition :
Each 100 gm contains 0.55 gm
Ortho-phthalaldehyde

Salient Features

- Fast acting
- Excellent microbicidal activity
- Superior mycobactericidal activity
- No activation required
- Odor not significant
- Excellent material compatibility
- Dose not coagulate blood or fix tissues to surfaces

Packing Configuration
1 Ltr, 5 Ltr

HOSPI25

Surface Disinfectant with
corrosion inhibitors

Ethanol, 2-Propanol &
1- Propanol Solution

Composition :
Ethanol 10 gm
2-propanol 9 gm
1-propanol 6 gm

HOSPI70

Surface Disinfectant with
corrosion inhibitors

Isopropyl Alcohol
70% Solution

Composition :
Each ML Contains
Isopropyl Alcohol 70%

Salient Features

- Ready-to-use disinfectant
- Solution acts rapidly and comprehensively
- Gentle on materials
- High grade surfactants for better cleaning
- Corrosion inhibitor to avoid corrosion

Packing Configuration
250 ml, 500 ml
