

A Fully-Integrated
Pharmaceutical Company
Fulfilling Next-Generation
Healthcare Needs Efficiently

"A WHO-GMP Certified Company"

Introduction:

Nest Healthcare Private Limited is a fully integrated pharmaceutical company. Nest is committed to ensure global right to healthcare by compiling the worldwide need for safe, effective and affordable medicines.

Nest serves the healthcare industry with its comprehensive services of formulation development and manufacturing. The services include Pre-Formulation, Formulation Development, Stability Studies and Method Development. As an all-inclusive provider, Nest undertakes projects for new product development, file applications with Directorate Controller General of India (DCGI). Based upon approval, we offer finished quality products in pre-approved packaging to clients.

Operated by professionals, Nest is managed with accuracy, precision, and perfection. Nest also focuses on personal development of their personnel while ensuring safety standards for its work force. Nest adheres to ethical obligations towards their stake-holders, the community and the environment.

» Located in pollution-free environment

Nest Healthcare thrives in the midst of eco- friendly and pollution-free green environment.

» Certified Manufacturing Unit

Manufacturing unit is certified by WHO-cGMP, GLP and ISO 9001:2015 guidelines.

» Free from Bacteria and Contaminants

The unit is equipped with High Efficiency Bacteria Retaining Filters (0.3 Micron – 99.995% Mini Pleated HEPA), closed loop water system and cGMP complying machineries with PLC, as required.

» Commitment to Quality Healthcare Products

Nest is committed to deliver unsurpassed quality of innovative health products at cost-effective rates.

“We weave health to life!”

Mission:

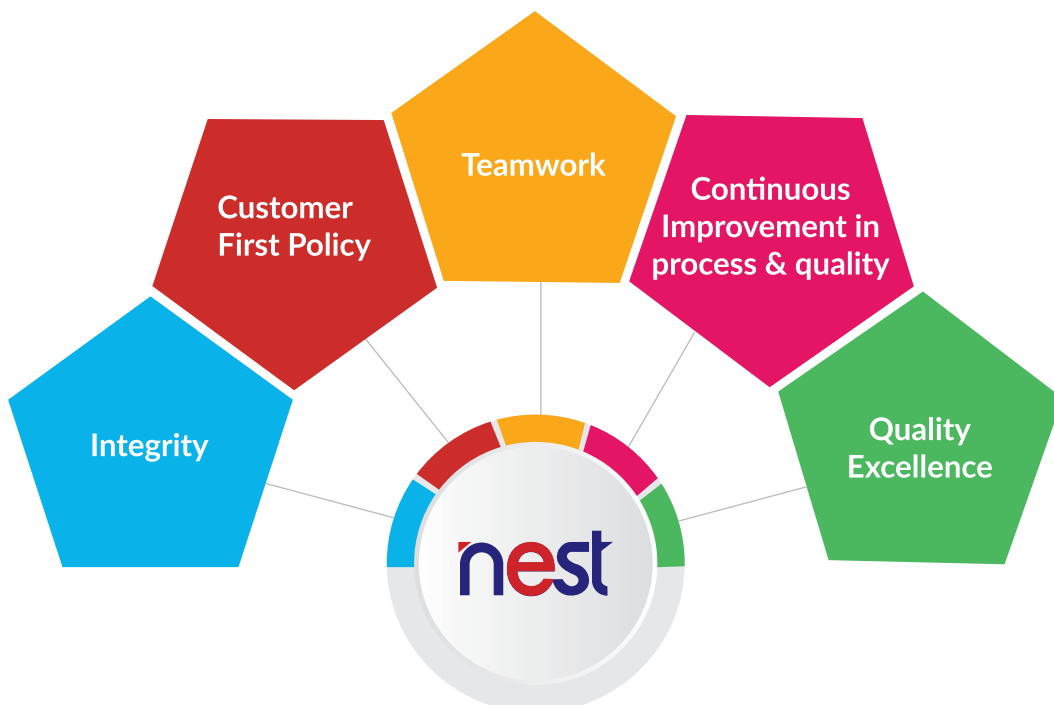

As an innovative and reliable health partner, our mission is to offer quality and affordable healthcare solutions.

Values:

Nest core values include our commitment for optimal health with integrity, transparency and unity.

Quality Policy:

Nest firmly believes that “quality” should be inherent to the process rather than the product. Nest's manufacturing facility upholds the highest standards of quality control and assurance for all SOP (Standard Operating Procedures) ensuring efficient and hazard-free operations.

**“Our quality standards
adhere to international
guidelines viz. WHO – cGMP.”**

Manufacturing Facility Attributes:

- » Well equipped with HVAC systems, water system with closed loop and sophisticated automated equipment, aligned with WHO – cGMP guidelines.
- » Appropriate room space for existing operations adequate to scale up development.
- » In Houses Administration, Quality Control Laboratory, Quality Assurance and Formula Development sections.
- » Constructed with attention to detail and foresight to alleviate possibilities of cross-contamination.
- » I – Shaped manufacturing facility corridor for convenience of internal movement of resources.
- » Processing and packaging areas have been isolated from corridors by ideal airlocks and pressure differentials.
- » Wide number of stores and quarantines built to store materials and finished products.

Quality Control Measures:

Nest follows all the standards set by WHO to certify finished products and has set in-house standards to value the products manufacture.

Nest QC department has all necessary instruments to analyse of API, finished products, packaging and related materials.

The QC activities are managed through four sections:

- » Instrumental Analysis of products
- » Physicochemical Testing Laboratory
- » Microbiological Testing Laboratory
- » Packaging Material Testing Laboratory

We at the Nest always provide better training to update employee's knowledge for different types of testing. Our staff is well trained to qualify materials and products.

Quality Assurance Efforts:

Nest quality policy is mandated and supported by the executive management and coordinated by an Independent Corporate Quality Assurance (CQA) Department. Quality Assurance efforts are independent to manufacturing and performed during the process of manufacturing itself.

CQA handles following activities for assuring quality of products:

- » cGMP training
- » SOP compliance
- » Audit of facility for compliance
- » Line clearance
- » In-process counter checks
- » Critical sampling
- » Record verification
- » Product release
- » Stability of products

Engineered Utilities:

Nest manufacturing facility has been equipped with well- engineered utilities that are considered as our backbone to our operations.

- » HVAC Systems (Heating, Ventilating, Air Conditioning Systems)
- » Closed Loop R.O. Water System with EDI technologies
- » Dry Type Air Compressors
- » Effluent Treatment Plant
- » CCTV driven Surveillance along with controlled access card systems

Choose us as a partner in

- » Divesting your holdings
- » Providing “Idea” platform for growth
- » Holding Technology Transfer
- » Contract manufacturing
- » Patent filing, DMF filing and Regulatory Assistance
- » Partnering with us as a loan-licensee

Product Range:

CARDIOVASCULAR

ANTI DIABETICS

LIPID LOWERING

PAIN MANAGEMENT

ANTI ALLERGICS

VITAMINS & NUTRITION

ANTI ULCERENTS

ANXIOLYTICS

ANTIBACTERIALS

ANTI FUNGAL

NEUROPATHY MANAGEMENT

GYNECOLOGY
