Manufacturing Facility

With a small-scale inception in 2004, our manufacturing facility has seen a positive and promising growth. This has led to the development of a large-scale world class manufacturing facility in Pune in a span of very few years.

The new manufacturing facility, of 10000 square meters, is developed in line with strict adherence to WHO GMP standards and is licensed by Food and Drugs Administration, India.

Dosage form:

Tablets, Capsules & Injectables

Manufacturing capabilities:

Manufacturing is carried out employing automated and semi-automated operations backed by excellent technical expertise and is divided into two sections:

1. Pharma
2. Herbal
3. Dietary Supplements

Quality products and valuable service:

Our experienced and qualified professionals form the backbone of our organization and our deep sense of quality products and service to society is the cause of our existence. Our life saving medicines, herbal products and food supplements covering various therapeutic segments are manufactured with superior and world class technologies. Our products are well accepted in the national and international healthcare and well-ness segment. We have identified and developed strong internal controls that adhere to the **most stringent quality control procedures**.

Our Business and therapeutic segments:

We are a multi-million company with International and National presence.

Internationally, we have a healthy presence in CIS countries, Europe, South East Asian Countries and US with established distribution channel and channel partners.

On the National front, our presence spans six years with foot-prints in Northern and eastern states, Maharashtra and Mumbai. With our reach to over 3 lakh doctors, 6 lakh retailers through our Marketing and Sales Team we could impact these markets in a short period of time.

Therapeutic Segments:

Our product offerings cater to a wide range of therapeutic segments with both Allopathy medicines as well as Single and Poly herbal Ayurvedic formulations.

Some of the major segments we cater to are:

- Cardio-Vascular
- Oral anti-Diabetics
