A large, abstract molecular structure graphic composed of numerous interconnected spheres in teal, dark blue, and black, forming a complex, branching network that spans the entire background of the page.

Touching Lives through
Chemical Excellence

About Us

Valence Labs is a research-driven pharmaceutical API company dedicated to working at the forefront of chemical and pharmaceutical innovation. Established in 2021, Valence has strived to become a leading global manufacturer of high-quality APIs with an unwavering commitment to product quality.

The company embarked on a greenfield project for APIs and advanced intermediates manufacturing within a sprawling 21-acre site at Punjab, India. Moving forth on this journey, our steadfast efforts are determined to emerge as a preferred and reliable partner for pharmaceutical companies worldwide facilitating the development of life-changing medications.

Manufacturing Facility

Our modern GMP-compliant manufacturing facility covers 7000 square meters footprint and four floors with separate areas for intermediate and API production. Empowering innovation with cutting-edge technology, the facility is meticulously designed to ensure the highest standards of manufacturing and meet the regulatory standards of the US, Japan, and the EU.

We've invested in the latest equipment to facilitate precision and efficiency in API production. Our manufacturing lines are equipped with advanced process controls ensuring consistency and quality in every batch.

- Facility designed for multiple product manufacturing
- Class 100,000 (ISO 8) cleanroom modules with 0.3 micron terminal HEPA filters
- Contained Powder Transfer Systems for all powder transfers
- Separate entries for man and material
- Airlocks at all entry areas
- Online metal detection system for final product
- DCS system for critical process controls
- 100% power backup
- Exclusion of penicillins, cephalosporin, steroids, cytotoxics, and agrochemicals' products development or production at the site.

Science and Technology

At Valence, we have a fully integrated Active Pharmaceutical Ingredient (API) R&D centre suitable for performing reactions over broad pressure-temperature ranges. It is supported by a robust "Analytical Research and Development" division, equipped with advanced and latest instruments.

Developing products through cutting-edge technologies, green chemistry, and cost-effective processes, the centre ensures continual improvements following "Product Life Cycle Management."

A dedicated team of scientists develops non-infringing processes from gram scale to kilogram scale synthesis. "Manufacturing Science and Technology" division ensures efficient technology absorption and transfer through competent Chemical Engineers and experienced Chemists.

Core Chemistry Competencies

- Grignard's reaction
- Friedel-Crafts acylation
- Enzymatic Reduction
- Chlorination
- Chiral Chemistry
- Organometallic Chemistry
- Coupling Reactions

Quality

At Valence, we believe in 'Quality by Design', which is embibed in every product we manufacture. With a stringent quality management system in place, product quality and patient safety is ensured.

Valence has state-of-art Quality Control function which is equipped with all latest chromatographic and non chromatographic instruments, complying to 21 CFR Part 11 requirement.

Product List

APIs				
Product	CAS No	Pharmacopoeia	Therapeutic Category	Status
Ursodeoxycholic Acid	128-13-2	IP/USP/EP/BP	Cholelithiasis Agent	Commercialised (DMF available)
Phenylephrine Hydrochloride (Oral and Injectable)	61-76-7	IP/USP/EP/BP	Decongestant	Commercialised (CEP Filed)
Pentazocine	359-83-1	IP/USP/BP	Analgesic	Commercialised
Dapagliflozin Propanediol	960404-48-2	USP	Antidiabetic	Commercialised (DMF Available)
Dexketoprofen Trometamol (Oral and Injectable)	156604-79-4	In-House	Anti-Inflammatory	Commercialised (DMF Available)
Ketoprofen	22071-15-4	USP/EP	Anti-Inflammatory	Commercialised
Citicoline Sodium (Oral and Injectable)	33818-15-4	IP/USP	Psychostimulant	Commercialised
Fexofenadine Hydrochloride	153439-40-8	IP/USP/EP/JP	Antihistaminic	Under Commercialisation
Vonoprazan Fumarate	881681-01-2	In-House	Antiulcerative	In Pipeline
Bilastine	202189-78-4	In-House	Antihistaminic	In Pipeline
Tranexamic Acid	1197-18-8	IP/USP	Antifibrinolytic	In Pipeline
Nicotine	54-11-5	EP/USP	Stimulant	In Pipeline
Tolvaptan	150683-30-0	IP	Diuretic	In Pipeline
Intermediates				
Product	CAS No	End Use	Intermediate Code	Status
Phenylephrine Base	59-42-7	Phenylephrine	PHP Base	Commercialised
3-Hydroxyacetophenone	121-71-1	Phenylephrine	3-HAP	Commercialised
2-[benzyl(methyl)amino]-1-(3-hydroxyphenyl)ethan-1-one hydrochloride	71786-67-9	Phenylephrine	-	Under Commercialisation
3-Nitroacetophenone	121-89-1	Phenylephrine/ Dyes	3-NAP	Under Commercialisation
Fexofenadine Base	83799-24-0	Fexofenadine	Fex Base	Commercialised
Methyl 2-(4-(4-(4-(hydroxydiphenylmethyl)piperidin-1-yl)butanoyl)phenyl)-2-methylpropanoate	154477-55-1	Fexofenadine	Fex X/ D10	Commercialised
L-proline benzyl ester hydrochloride	16652-71-4	Lisinopril	LIS-3	Commercialised
Phenylacetone	103-79-7	Lisdexamfetamine	-	Under Commercialisation

Note: These products are not available for sale in countries where the patents are applicable or still valid
