ABOUT US

Orbit Pharmaceuticals is a dynamic and privately held UK-based company dedicated to ensuring quality and safety in the pharmaceutical industry. Our primary focus is on developing and marketing specialized generic drugs, encompassing a wide range of dosage forms such as tablets, capsules, oral solutions, injectables, sachets, and PFS. We are committed to providing high-quality medications that meet the needs of patients not only in the United Kingdom and Europe but also in key markets around the world including Australia, New Zealand, Canada, and the United States. With a steadfast commitment to excellence, we aim to positively impact global healthcare by delivering reliable and effective pharmaceutical solutions.

DEVELOPS, MANUFACTURES AND SUPPLIES

COST Effective Complex Medicines

STRENGTH

- We have a dedicated team of scientists and researchers who are committed to driving innovation and producing cutting-edge solutions through our **In-house research and development (R&D)**. We are a cost-effective **Contract Manufacturing Organization (CMO)** for **Technology Transfer (TT)**, offering efficient and reliable manufacturing services.
- We have **In-house Bioequivalence (BE)** and **Bioavailability (BA)** studies with substantial Regulatory Affairs expertise, well-versed in managing **In-house Submissions** such as E-CTD, Common Technical Dossier (CTD), and Asean Common Technical Dossier (ACTD).
- We have a dedicated **In-house Pharmacovigilance (PV)** team that actively monitors and evaluates the safety profile of our products, ensuring any adverse events are reported and analyzed.

PARTNERING

Partnering is a key driver of our success and growth in the pharmaceutical industry. We use our in-house capabilities to develop and manufacture finished formulations, transfer technologies for local manufacturing, co-develop research-based pipelines, and expand our portfolio through In-Licensing and Out-Licensing.

OUR EXPERTISE

Product Development

Early-stage formulation and analytical development, technology transfer, scale-up, process validation, stability testing, CRO selection, and clinical study design are examples of development activities.

Supply Chain

The supply chain management team provides tasks such as artwork management, demand planning, launch management, production planning, and financial control.

Project Management

Our professional project management team helps to achieve maximum results within agreed timelines, leading to cost-effectiveness and high-quality deliverance.

Regulatory Affairs

Our first-time right regulatory approach ensures cost-effectiveness and high-quality deliverance, resulting in cost-effectiveness and rapid turnaround.
