www.naturaayur.com

ABOUT US

Natura Ayur Science is a leading manufacturer of standardized botanical extracts, essential oils, oleoresins, etc. for personal care, nutrition and health industry. We are a corporate entity created and registered under the Companies Act 1956 and is located in Bangalore, India.

Since the inception of Natura Ayur Science we believe that there is an efficient way of manufacturing products with the highest level of purity while using sustainable, eco-friendly practices. We have a team of dedicated scientists and management staff with over a decade of experience to provide cost effective and quality product. We explore and take inspiration from nature to produce standardized plant extracts and offer it to various industries that formulate beneficial products for the general market.

Manufacturing Prowess

Equipped with cutting-edge technology & operated by professionals, our facilities hold the highest standards of quality & safety.

Sourcing Excellence

We meticulously select top-quality raw materials from trusted growers, ensuring sustainability and ethical practices.

Diverse Offerings

From herbal supplements to sports nutrition, our comprehensive range empowers individuals to lead healthier lives.

Research & Innovation

We foster creativity, driving us to pioneer newer techniques and refine manufacturing processes for groundbreaking products.

We are a forerunner in producing standardized plant extracts, essential oils and oleoresins for health supplements, personal care, home care, cosmetics, finished formulations, food and beverage products. We also cater to industries requiring proprietary cosmeceutical blends and symbiotics.

As the world shifts towards natural resources, we welcome this timely move with our various products from botanical source which are Halal and Kosher certified. We produce pharmaceutical-grade ingredients, aware that they will be used in the health care industry. Hence utmost care is taken to prepare nothing less than the best quality products as per industry standards

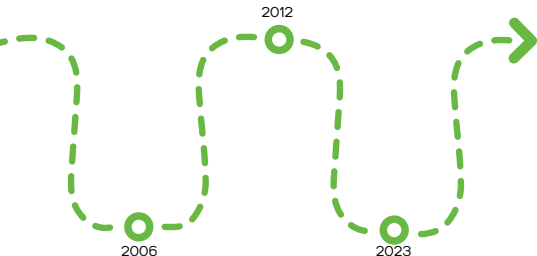

Our botanicals also serve as ingredients for Nutritional products, Infant food, Sports nutrition. We are pioneers in the use of traditional knowledge and amalgamate it with modern science to rediscover and authenticate Ayurveda's secrets. We believe in working towards preserving Ayurveda.

OUR JOURNEY

We took a stepping stone by initially establishing a small trading firm in the year 2006 which operated as sourcing and supplying natural produce from various parts of India. Our goal was not just to bring healthy and socially responsible goods to the market, but also to ensure that they benefit small and marginal farmers. Our vision is to provide a complete Herbal solution for healthy living.

As a trading company, we encountered multiple challenges. Not only did we need to ensure that natural farming was a financially feasible alternative for farmers, but we also needed to ensure that the resulting products adhered to strict international quality requirements.

Overcoming all obstacles and difficulties, we were able to successfully found our raw material sourcing business, which is currently known as Guru Kripa Agro Tech. Following this, the idea was to start producing standardized herbal extracts and endeavor to offer comprehensive solutions for healthy living; with this end in view, Natura was founded in 2012. As we understood the developments in the market and the needs of our customers it was necessary to update to meet both domestic and international market standards.

Natura Ayur Science Pvt Ltd was founded in 2023 with the intention of setting up our manufacturing facility for the production of herbal extract that satisfies regulatory requirements of the industry standards. The team is solely focused on creating premium-quality, in-house herbal products. The company was founded with a highly efficient staff for research and development, supply chain, production, and quality.

AYURVEDA : THE ALTERNATE UNIVERSE

Ayurveda is one of the world's oldest holistic healing systems, developed 5000 years ago in India. It is a treasure trove of knowledge and has provided native remedies for a variety of diseases while documenting the therapeutic capabilities of countless herbs and plants. WHO says 80% of the world population uses traditional medicine for primary health care.

At Natura Ayur Science, we work to integrate cutting-edge modern techniques with ancient Ayurvedic wisdom. After thoroughly researching various plants characteristics and medicinal components, we identify, extract, concentrate and formulate our products. Our long-term goal is to safeguard Ayurveda as a special reservoir of antiquated knowledge and facilitate its modern application for the benefit of humanity.

OUR VISION

To mark Natura Ayur Science presence in the world market as a provider of complete solution for healthy living by utilizing combined knowledge of Ayurveda, and science. To tap the rich bountiful natural resources ensuring sustainability and safety of our ecology.

OUR VALUES

- To conduct business based on trust, mutual respect, and integrity.
- To winnovate new products based on customer requirements and market needs.
- To support suppliers with advisory and technical support, irrespective of their size and location.
- We provide the best quality products and guarantee customer delight with a timely delivery system.
- We give back to society, by providing support programmes for improving social health of farmers community and the environment.

OUR UNIQUENESS

We take pride in the wide array of products and services that our company offers, bearing in mind to always follow conscientious work ethics. Our experienced professionals are constantly on the lookout for novel or known herbal extracts with active compounds that can be used as a lead for production of a wide range of innovative products. We ensure that our customers have comparative advantage over our competitors, owing to the timely delivery of our high quality, price-worthy products.

We take great care to preserve the quality right from the source till the final product reaches our valued customers.

We preserve the essence of nature in our products with reliable scientific techniques.

FACILITIES

Natura Ayur Science boasts of a state-of-the-art manufacturing plant capable of yielding high volume production with consistency in quality. Situated in the south-central part of the state of Madhya Pradesh is Betul district, nestled on the Satpura hill range. We are in a Joint Venture (JV) with Zivisha Herbal & Organic Private Limited where we have our manufacturing facility. All our manufacturing units are operational 24x7, throughout the year, with a total manufacturing capacity of 8 metric tons per day. We follow strict cGMP guidelines and prioritize the purity of extracts.

Thanks to our conveniently located units and resources that are readily available, optimal level of productivity is always ensured.

Our solvent extraction units are up and running for large-scale production of oil and oleo-based products and water extracts. Apart from this we have powdered beverages and premixes prepared and ready for consumption. Our reliable delivery system, never lets us hinder in our issuance of quality products at all times.

QUALITY POLICY

Quality Assurance/ Quality Control (QA/QC) team ensures that our products are of the highest purity and premium quality. The quality standards we follow guarantee pure, natural, non-GMO, allergen and contaminant free products. We monitor the regulatory environment to ensure that all our products comply the requirements. Our manufacturing units and products are ISO, GMP, HALAL, and KOSHER compliant.

Our Research and Development team is always on its toes, in innovating new products and concepts for the end users. We know that our products are used for human and animal healthcare, and we take great care to provide our customers with the highest quality products

INNOVATION

We believe that today's trial will be the tradition of the future. So, at Natura Ayur Science, we thrive through innovation and always look for ways to better ourselves in our trade. We focus on developing and commercializing plant-based products in a broad scope of applications from Human and Animal health to food and nutrition and cosmeceutical products.

The nature we are surrounded with is the epitome of inspiration for us. It never ceases to amaze us with its rich and diverse resources. Innovative efforts are always in place to harmonize with nature and use modern scientific knowledge and natural resources for the larger benefit of humanity.
