Breather..... for Life.

Warehouse Facility

- ☐ Dedicated area for RM/PM
- ☐ Linear Material flow
- ☐ Desired as per the Storage Capacity
- ☐ Followed Good Warehousing Practices

Clean Room Facility

- ❑ The state-of-the-art facility
- ❑ Linear process flow
- ❑ Designed as per
USFDA guidelines
- ❑ WHO-GMP certified

Instrument Lab..

Quality Control

- ❑ The full-fledged QC Lab.
- ❑ Good Laboratory Practice (GLP) Compliant.
- ❑ Dedicated labs.
- ❑ For Chemical, Instrumentation, Microbiology, & PM Testing.

Why Benzene-free Propellants?

Health & Safety

By removing Benzene, we are prioritizing the health and safety of consumers ensuring that formulators can confidently incorporate them into their daily routine, without compromising their users' well-being.

Environmental Responsibility

Benzene is not only a health concern but also poses environmental risks, by using Benzene-free propellants, formulators support a more sustainable and eco-friendly approach by reducing harmful emissions into the environment.

Efficiency & Effectiveness

The process does not change the chemical properties of CLEAN GAS, thereby maintaining its efficiency and effectiveness.

Benzene is a known human carcinogen and genotoxicant with no known safe level of exposure.

Some of Our Esteemed Customers

Thank you!
