BILLION
CAPSULES

FACILITY

Keeping in view the WHO requirements, the facility has been designed after consulting experts in the field who have several years of experience in the industry. The planning has been done such that the entire facility is uni-directional, has clear paths for men and material and process movement thus eliminating any possibility of cross contamination.

- » Each automatic manufacturing line is housed in an independent room to eliminate the risk of cross contamination.
- » State-of-art and fully atomized Gelatin room ensuring perfect controls in quantity, temperatures and viscosity.
- » To monitor critical process parameters the entire operation is controlled by state of art equipment such as SCADA, etc.

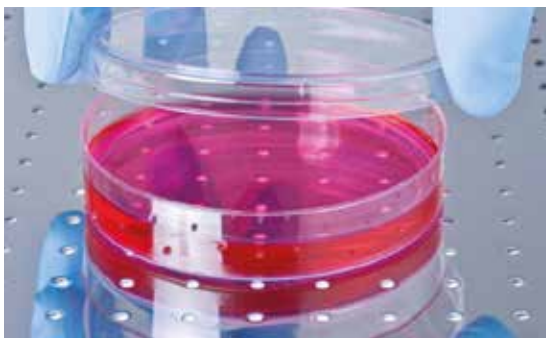

Clean Room, GMP
and State-of-Art Facilities

TRUST. SAFETY.
PRODUCT INTEGRITY.

- » HealthCaps has a 3 decade record of safety of the product.
- » We have clean room GMP facilities with high precision machinery.
- » We use the highest quality ingredients.
- » HealthCaps has state-of-art laboratories for testing raw materials and products through the process.
- » Certification and compliance by government agencies enables HealthCaps to supply its products to pharmaceutical and H&N companies world over.
- » We have invested in camera inspection machines and 100% of capsules are subject to camera inspection.
- » HealthCaps recognises that product integrity and customer satisfaction are of primary importance to its success.

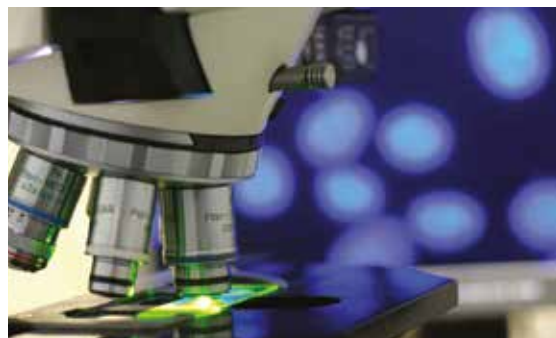

Q.C Labs

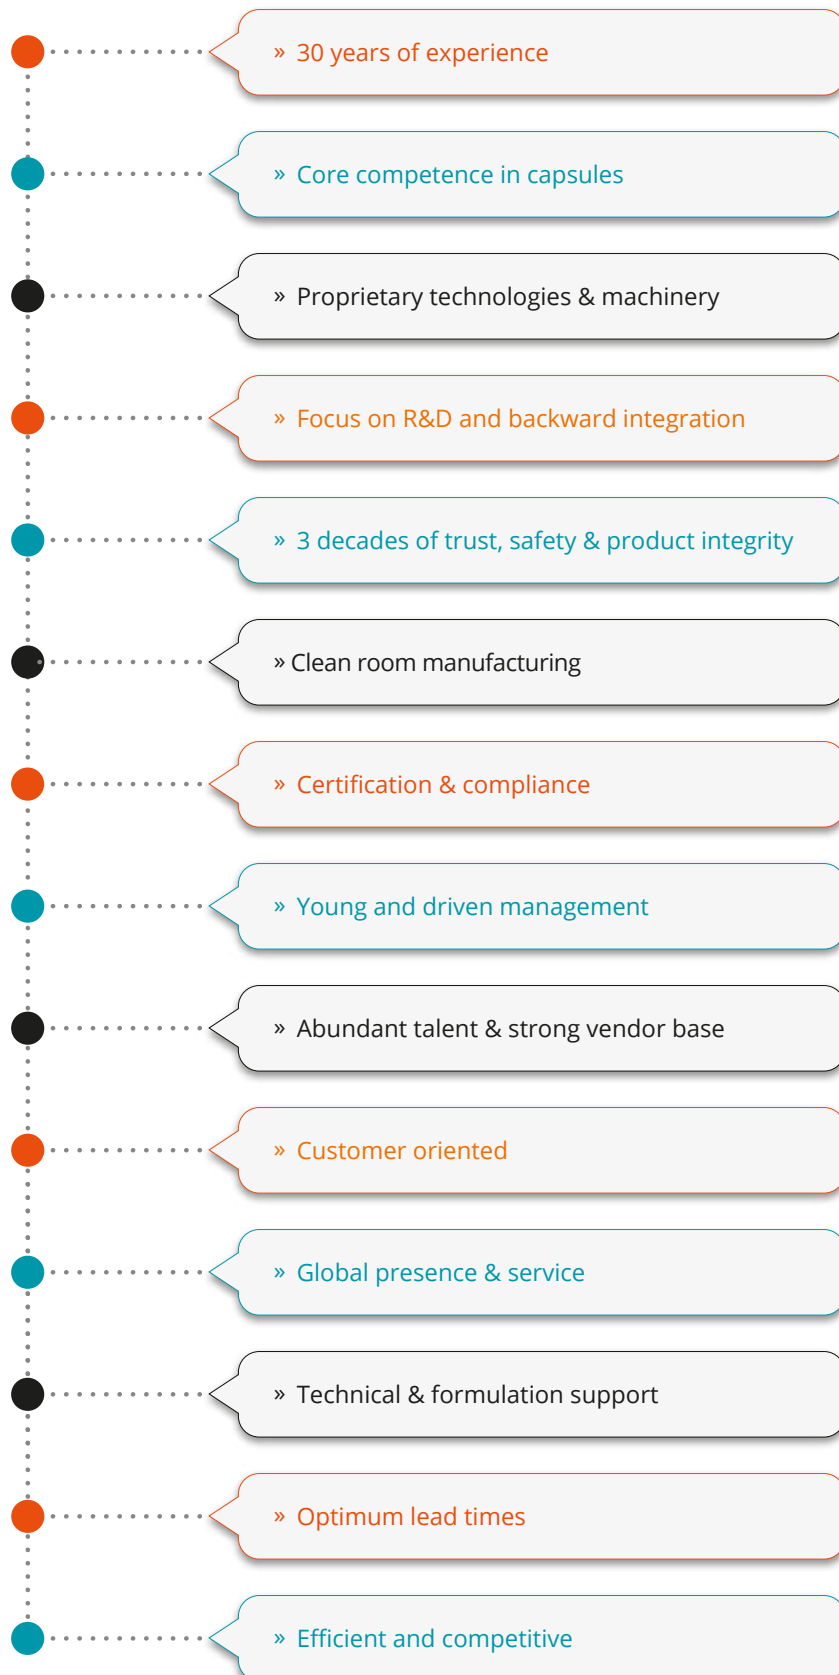

QUALITY. ENGINEERING. INNOVATION.

- » Set up of R&D and machine manufacturing unit in 2013.
- » We are growing at 20% CAGR - HealthCaps invests 6% of top line into research.
- » Own machine manufacturing - proprietary technologies that can not be procured from the market and are most advanced using latest technology available in the world.
- » Servo drives to replace cams.
- » PLC operated machines.
- » Process controls like SCADA to monitor critical process parameters.
- » Advanced electronic gauges to check capsule dimensions.
